The New Strategic Brand Management - Jean-Noël Kapferer 2008-01-03
Adopted internationally by business schools, MBA programmes and marketing practitioners alike, The New

Strategic Brand Management is simply the reference source for senior strategists, positioning professionals and postgraduate students. Over the years it has not only established a reputation as one of the leading works on brand strategy but also has become synonymous with the topic itself. The new edition builds on this impressive reputation and keeps the book at the forefront of strategic brand thinking. Revealing and explaining the latest

techniques used by companies worldwide, author Jean-Noël Kapferer covers all the leading issues faced by the brand strategist today, supported by an array of international case studies. With both gravitas and intelligent insight, the book reveals new thinking on a wealth of topics including: brand architecture and diversity strategies; market adaptation approaches; positioning in the private label and store brand environment, and much, much more.

Whether you work for an international company seeking to leverage maximum financial value for your brand, or whether you are looking for practical guidance on brand management itself, Kapferer's market-leading book is the one you should be reading to develop the most robust and watertight approach for your company.

Seventeen Nobel Prize winners and 19 Pulitzer Prize winners - from Mahatma Gandhi to Kurt Vonnegut Jr. - have written for the magazine.

Technology Acceptance of Connected Services in the Automotive Industry -

Clemens Hiraoka 2009-09-30
Telematics in the automotive industry are the most popular example of Connected Services. But despite their implementation in several million of vehicles worldwide, there has only been little consideration in research. Clemens Hiraoka analyzes the entire customer lifecycle from awareness, acceptance, and usage to the renewal of the service contract and uncovers the drivers in each of these stages. His evaluation gives a series of new implications for

Energy Fables - Jenny Rinkinen
2019-05-03

*Energy Fables: Challenging
Ideas in the Energy Sector*
takes a fresh look at key terms
and concepts around which
energy research and policy are
organised. Drawing on recent
research in energy and
transport studies, and
combining this with concepts
from sociology, economics,
social theory and technology
studies, the chapters in this
collection review and challenge
different aspects of received
wisdom. Brief but critical
introductions to classic notions
like those of 'energy
efficiency', 'elasticity', 'energy
services' and the 'energy
trilemma', together with
discussions and analyses of
well-worn phrases about 'low
hanging fruit' and 'keeping the
lights on', articulate aspects of
the energy debate that are
often taken for granted. In re-
working these established
themes and adding twists to

Frommer's Touring Guide to Florence - François Monmarché 1987

Offers tips on planning a trip to Florence and recommends a tour through the museums, galleries, churches, palaces, and other sights and attractions in Florence

Innovation Management - Jan van den Ende 2021-10-01

Not solely covering new products, Innovation Management focuses on new services and new business models; in doing so, it provides an introduction to new business development. The book follows the logic of the innovation process, from idea development via selection to

implementation, and discusses these topics both on the level of the company and individual projects. Its content is evidence-based, but with many practical examples. This textbook ensures up-to-date subject knowledge by providing a contemporary approach: novel methodologies such as design thinking, lean innovation and open innovation are included. Exercises and discussion questions at the end of each chapter enable self-testing and reflection.

Comprehension of new topics is aided by an in-margin glossary and further multimedia links on the companion website. It is an essential resource for undergraduate students seeking a rigorous and science-based, yet accessible and manageable, overview of innovation management.

revolution in materials design, then *Designing with Smart Textiles* is the complete toolkit you need to get started. Beginning by introducing the terminology and key applications, the book goes on to examine the key design processes needed to develop interactive textile design concepts, with detailed projects and examples to help you apply these approaches in your own practice. Case studies and interviews with innovative designers introduce you to different artistic and technological practices, and demonstrate how world-leading researchers are creating new technologies, yarns, fabrics, and applications. Practitioners share unique insights into their processes, and “Tech Tips” so you can build on their research in your own work. Featured designers include: Yemi Awosile, Joanna Berzowska, Lauren Bowker, Marina Castan, Cute Circuit, Felecia Davis, Debbie Davies, Delia Dumitrescu, Martha Glazzard, Ramyah Gowrishankar, Intelligent Textiles Ltd., Sara

Keith, Ebru Kurbak and Irene Posch, Barbara Layne, Eef Lubbers, Anna Persson, Mette Ramsgaard Thomsen, Rose Sinclair, Mike Starbuck, Lynn Tandler, Paola Tognazzi, Sarah Walker and Linda Worbin

EBOOK: Foundations of Economics - David Begg
2013-04-16

Foundations of Economics, fifth edition is ideal for students taking introductory economics modules as part of an interdisciplinary course.

Building on the success of the previous editions, the book provides accessible overviews of key economic topics, interweaving these with real-world examples and practical activities to equip students to think for themselves. Features of this edition include: Topical and up-to-date material, presented alongside real-world examples and policy problems. Additional mini case studies on areas such as banking, youth unemployment, sport and the music industry, to demonstrate the practical application of economics in contemporary situations. Consideration of the

global financial crisis, European economy and recent policy developments Succinctly offering the proven quality, consistency and clarity of the parent text Economics ('The Student Bible', BBC Radio 4), Foundations of Economics, fifth edition is the essential text for today's non-specialist economics student. The book is accompanied by an excellent resource package at www.mcgraw-hill.co.uk/textbooks/begg, which includes: For students: Interactive graphing tool, case studies, self-test questions, weblinks For lecturers: PowerPoint slides, lecture outlines, EZ Test Online test bank, videos & teaching notes, figures from the book, solutions to questions in the book & additional exam questions

Citroen Berlingo & Peugeot Partner - Haynes Publishing 2014-07

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and

photographed in a step-by-step sequence so that even a novice can do the work.

Road Congestion Pricing in Europe - Harry Ward Richardson 2008-01-01

. . . this book is an interesting collection of papers on the topic of road congestion pricing. . . The reader should find this collection to be both interesting and informative, but also quite thought-provoking. . . The papers also provide some very useful information about projects that have not worked or have not been implemented for various reasons and lessons that can be learnt from failures to implement and failures of pricing schemes. Peter R. Stopher, International Planning Studies In February 2003, the London Congestion Charging Scheme was introduced and in 2006 a similar policy was introduced in Stockholm. In both cases automobile traffic entering the cordon declined by about 20 percent. This book evaluates these and other similar programs exploring their implications for the

United States. While there is increasing interest in road pricing in the US in many individual states, the motivation is often highway financing rather than congestion relief. The contributors argue that the prospects for extensive implementation in the US remain uncertain. Nevertheless, this book illustrates that the European experience suggests political feasibility is much less of a hurdle than was once considered and that congestion pricing would have a significant impact in reducing traffic as it did in Europe. This study's value lies in the fact that it examines road pricing in the real world and not simply from a theoretical viewpoint. As a comparative study it will appeal to both policymakers and academics in transportation economics and planning, urban economics, planning and economic geography.

The Rough Guide to Provence & the Côte d'Azur - Greg Ward
2013-05-01

Now in ePub format. The Rough Guide to Provence and the Côte d'Azur, now in full color throughout, is the ultimate travel guide to the most compelling region of southern France. Discover the local highlights with stunning photography, color-coded maps, and more listings and information than ever before. You'll find detailed practical advice on everything to see and do, from great cities like Aix and Avignon to the vibrant port of Marseille, the eerie marshlands of the Camargue and the glamorous resorts of the Côte d'Azur. Up-to-date descriptions of the best hotels, bars, and restaurants suit all budgets. With in-depth descriptions of every destination, suggested itineraries, and "Top 5" ideas,

The Rough Guide to Provence and the Côte d'Azur will help you make the most of this beautiful region.

International and Comparative Business - Leo McCann 2013-11-14

'Erudite and accessible, McCann demonstrates how the national gets reconfigured around the global without losing some of its unique features. Far from being a one-size-fits-all Anglo-American template, neoliberalism comes in many different hues and variations. This is by far the best textbook in the field and is destined to become a classic for years to come.' Manfred B. Steger, Professor of Political Science at the University of Hawai'i-Manoa, Honolulu, Hawai'i, USA 'A sweeping examination of systems of capitalism in theory and in the world's major industrial economies leads Leo McCann to challenge the conventional wisdom on globalization. Historical analysis of the evolution of business systems and detailed examination of present practice demonstrate

persuasively that, despite facing common challenges, distinctive national differences remain salient. A must read for anyone who needs to understand how business systems operate in an increasingly interdependent world economy.' - Dr Eileen Appelbaum, Senior Economist, Center for Economic and Policy Research, Washington, DC, USA Globalization has profound effects on national economies even as distinct national 'models' of capitalism remain. International and Comparative Business accessibly tracks the historical and socio-political contexts of the world's major countries on a chapter-by-chapter basis to the present day. The book provides a comprehensive, critical, yet concise introduction to each of the economies' key features, including macro overviews as well as organizational and workplace-level analysis. Each chapter features learning objectives, in-depth interpretation and critique of key literature, and annotated

further reading to allow readers to rigorously navigate their way through the wealth of material available for each country. This text is essential reading for students and researchers in the areas of international business and cross-cultural management, comparative political economy, and history. Leo McCann is Senior Lecturer in International and Comparative Management at Manchester Business School, University of Manchester, UK

Evolutionary Paths Towards the Mobility Patterns of the Future - Michael Hülsmann
2013-09-26

This edited volume presents new insights and challenges in the field of electric mobility in relation to new mobility and infrastructure concepts as well as to renewable energies. The book covers the socio-economic view on the topic as well as technical aspects and thus offers valuable knowledge for future business models. It primarily addresses practitioners and researchers in the field but may also be of

use to graduate students.

Complex Systems and Social Practices in Energy Transitions

- Nicola Labanca 2017-05-02

This book offers an interdisciplinary discussion of the fundamental issues concerning policies for sustainable transition to renewable energies from the perspectives of sociologists, physicists, engineers, economists, anthropologists, biologists, ecologists and policy analysts. Adopting a combined approach, these are analysed taking both complex systems and social practice theories into consideration to provide deeper insights into the evolution of energy systems. The book then draws a series of important conclusions and makes recommendations for the research community and policy makers involved in the design and implementation of policies for sustainable energy transitions.

Learning Rates of Electric Vehicles - Andreas Zerfaß

2017-11-01

Governments of many countries consider the

electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport-related carbon dioxide (CO₂) and air pollutant emissions. However, battery-electric vehicles (BEVs) and plug-in hybrid-electric vehicles (PHEVs) have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges, which still hampers the market potential of these vehicles. Despite persisting shortfalls, mechanisms such as technological learning and economics of scale promise to improve the techno-economic performance of BEVs and PHEVs in the short- to mid-term. Here, the author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by: (i) establishing experience curves and (ii) quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time-series analysis. The analysis captures the situation in Germany
