**Asset Recovery Handbook** - Jean-Pierre Brun 2021-02-08

Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be overwhelming for even the most experienced

practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.

**Handbook on the Crime Prevention Guidelines** - Margaret Shaw 2010

All countries strive to ensure safety and security for their citizens and to increase the quality of their lives. The Handbook offers a concise overview of the main considerations to be taken into account in planning and implementing crime prevention strategies and interventions. It also recognises that there are some major differences between regions and countries in terms of the challenges posed by crime and victimization and the importance of adapting programmes to local contexts. The main emphasis is on how crime prevention strategies based on the guidelines developed by the United Nations can be entrenched and sustained over time. It includes information on the kinds of methods and tools that can be utilised and are becoming increasingly available.

#### **Child Friendly Schools Manual - 2009**

This Child-Friendly Schools (CFS) Manual was developed during three-and-a-half years of continuous work, involving the United Nations Children's Fund education staff and specialists from partner agencies working on quality education. It benefits from fieldwork in 155 countries and territories, evaluations carried out by the Regional Offices and desk reviews conducted by headquarters in New York. The manual is a part of a total resource package that includes an e-learning package for capacity-building in the use of CFS models and a collection of field case studies to illustrate the state of the art in child-friendly schools in a variety of settings.

#### Perspectivas del Comercio Internacional de América Latina y el Caribe 2019 - Economic Commission for Latin America and the Caribbean 2020-02-12

En 2019 el desempeño del comercio mundial de bienes sería el peor desde la crisis financiera. En esta edición de Perspectivas del Comercio Internacional de América Latina y el Caribe se analiza dicho fenómeno, así como las crecientes tensiones comerciales y las repercusiones en el comercio regional. La fuerte desaceleración del comercio mundial responde tanto a la acumulación de barreras comerciales desde 2018 como a otros factores de más larga data. Entre estos se destacan la menor demanda mundial, la creciente sustitución de importaciones por producción nacional en algunas economías, la menor proporción de la

producción china que se destina a la exportación, el retroceso de las cadenas globales de valor y la irrupción de nuevas tecnologías que causan un impacto en la naturaleza misma del comercio. En el capítulo II se analiza la forma en que el comercio internacional puede hacer un mayor aporte a la sostenibilidad ambiental. Los vínculos entre comercio y medioambiente se han hecho más visibles desde los años noventa, como muestra el aumento de las controversias comerciales vinculadas con aspectos ambientales y la creciente incorporación de capítulos ambientales en los acuerdos comerciales. Por último, en el capítulo III se examina la situación de la infraestructura y la logística, aspectos clave para el comercio internacional y la producción. Se concluye destacando la necesidad de reexaminar las políticas públicas en materia de concesiones de infraestructura económica y el rol central de la acción regulatoria del Estado, especialmente en el ámbito de la competencia.

#### **Undermining Global Security** - Amnesty International 2004

Contains disturbing examples of exports from existing or new EU Member States of military, security and police (MSP) equipment, technology and expertise used for grave human rights violations or breaches of international humanitarian law. Reveals the arms production and exporting activities of the ten new countries joining the EU on 1st May 2004. Explores how the enlarged EU will have over 400 companies in 23 countries producing small arms and light weapons. Demonstrates how this dramatic enlargement of the EU presents both potential opportunities and dangers for European arms control. Analyses the current policies and practices of 15 EU Member States and the 10 new Member States with regard to their control of the transfer of military, security and police (MSP) technology, weaponry, personnel and training. It demonstrates why Amnesty is convinced that more effective EU mechanisms to control MSP exports are urgently required to help protect human rights and ensure respect for international humanitarian law.

#### **Model Law Against Trafficking in Persons** - United Nations Office on Drugs and Crime 2009

The publication was developed by the United Nations Office on Drugs and Crime (UNODC) in response to the request of the General Assembly

to the Secretary-General to promote and assist the efforts of Member States to become party to and implement the United Nations Convention against Transnational Organized Crime and the Protocols thereto. It was developed in particular to assist States in implementing the provisions contained in the Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing that Convention. The Model Law will both facilitate and help systematize provision of legislative assistance by UNODC as well as facilitate review and amendment of existing legislation and adoption of new legislation by States themselves. It is designed to be adaptable to the needs of each State, whatever its legal tradition and social, economic, cultural and geographical conditions.

The United Nations world water development report 2020 - UNESCO  
World Water Assessment Programme 2020-03-23

The 2020 edition of the WWDR, titled 'Water and Climate Change' illustrates the critical linkages between water and climate change in the context of the broader sustainable development agenda. Supported by examples from across the world, it describes both the challenges and opportunities created by climate change, and provides potential responses - in terms of adaptation, mitigation and improved resilience - that can be undertaken by enhancing water resources management, attenuating water-related risks, and improving access to water supply and sanitation services for all in a sustainable manner. It addresses the interrelations between water, people, environment and economics in a changing climate, demonstrating how climate change can be a positive catalyst for improved water management, governance and financing to achieve a sustainable and prosperous world for all. The report provides a fact-based, water-focused contribution to the knowledge base on climate

change. It is complementary to existing scientific assessments and designed to support international political frameworks, with the goals of helping the water community tackle the challenges of climate change, and informing the climate change community about the opportunities that improved water management offers in terms of adaptation and mitigation.

*The Art of War* - Sun Tzu 2021-03-18

The Art of War is an enduring classic that holds a special place in the culture and history of East Asia. An ancient Chinese text on the philosophy and politics of warfare and military strategy, the treatise was written in 6th century B.C. by a warrior-philosopher now famous all over the world as Sun Tzu. Sun Tzu's teachings remain as relevant to leaders and strategists today as they were to rulers and military generals in ancient times. Divided into thirteen chapters and written succinctly, The Art of War is a must-read for anybody who works in a competitive environment.

**Zero Limits** - Joe Vitale 2010-06-03

Praise For Zero Limits "This riveting book can awaken humanity. It reveals the simple power of four phrases to transform your life. It's all based in love by an author spreading love. You should get ten copies of it---one for you and nine to give away. It's that good." ---- Debbie Ford, New York Times bestselling author of The Dark Side of the Light Chasers "I love this book! I feel it will be the definitive personal-change/self-help book for at least a generation and viewed as a watershed event by historians. There is real potential for this book to start a movement that will end war, poverty, and the environmental devastation of our beloved planet." ---- Marc Gitterle, MD, www.CardioSecret.com "This book is like a stick of dynamite, and the moment you start reading, the fuse is lit. It blows away all the complex and confusing success paradigms of the past and reveals a refreshing and clear path to transform your life with just one simple step. As you explore Zero Limits with Vitale, be prepared for a journey that is both challenging and inspiring beyond anything you've

imagined." ---- Craig Perrine, [www.MaverickMarketer.com](http://www.MaverickMarketer.com) "There are more than 6 billion different manifestations of human existence on the planet?and only one of us here. In Zero Limits, Vitale has captured the truth that all great spiritual, scientific, and psychological principles teach at the most fundamental level. Boil it all down to the basics and the keys are quite simple---- the answer to all life's challenges is profound love and gratitude. Read this book; it's a reminder of the truth and ability you already possess." ---- James Arthur Ray, philosopher and bestselling author of Practical Spirituality and The Science of Success "Wow! This is the best and most important book Vitale has ever written!" ---- Cindy Cashman, [www.FirstSpaceWedding.com](http://www.FirstSpaceWedding.com) "I couldn't put it down. This book elegantly sketches what I've learned and learned about in twenty-one years of personal study, and then it takes it to the next level. If you're looking for true peace along with 'the good stuff,' then this book is for you." ---- David Garfinkel, author of Advertising Headlines That Make You Rich "Zero Limits is Vitale's adventure into the most mind-altering reading experience of your life." ---- Joseph Sugarman, President, BluBlocker Sunglasses, Inc.

Expert Seminar - International Organization for Migration 2008  
Environmental degradation, climate change and migration are not new to the global community. However, managing these phenomena has become both more challenging and more critical to ensuring human security and sustainable development. Not only are gradual and sudden forms of environmental change acquiring greater magnitude, but they are likely to lead to ever larger waves of internal and international migration, including mass human displacement. Migration is also having a demonstrable impact - at times positive, at others negative - on the environment in communities of origin and destination. Both phenomena are figuring more prominently in the eruption of new and old conflicts. Recognising the need to support improvements in research and policy for more effective management of the association between migration, the environment and other intermediating social, economic and political factors, the International Organization for Migration (IOM) and the United Nations Population Fund (UNFPA) co-sponsored a two-day Expert Seminar on Migration and the Environment in Bangkok, Thailand on 22-23 February 2007.

The Book of Satoshi - Phil Champagne 2014-06-11

"Have you, like the rest of the world, speculated as to the identity of Satoshi Nakamoto, anonymous creator of Bitcoin? The world's first cryptocurrency, Bitcoin went online in 2009 and has since revolutionized our concepts of currency and money. Not supported by any government or central bank, completely electronic, Bitcoin is a virtual currency based on advanced cryptographic systems. Like the currency he created, the identity of Bitcoin's creator Satoshi Nakamoto is virtual, existing only online. The Nakamoto persona, which may represent an individual or a

group, exists only in the online publications that introduced and explained Bitcoin during its earliest days. Here, collected and professionally published for the first time are the essential writings that detail Bitcoin's creation. Included are: Satoshi Nakamoto Emails and Posts on Computer Forums Presented in Chronological Order; Bitcoin Fundamentals Presented in Layman's Terms; Bitcoin's Potential and Profound Economic Implications; The Seminal Paper Which Started It All. The Book of Satoshi provides a convenient way to parse through what Bitcoin's creator wrote over the span of the two years that constituted his "public life" before he disappeared from the Internet ... at least under the name Satoshi Nakamoto. Beginning on November 1st 2009 with the publication of the seminal paper describing Bitcoin, this public life ends at about the time PC World speculated as to a possible link between Bitcoin and WikiLeaks, the infamous website that publishes leaked classified materials. Was there a connection? You be the judge. Nakamoto's true identity may never be known. Therefore the writings reproduced here are probably all the world will ever hear from him concerning Bitcoin's creation, workings, and theoretical basis. Want to learn more about Bitcoin? Go directly to the source - the writings of the creator himself, Satoshi Nakamoto!"--Amazon.com viewed October 1, 2014.

Dimensions of Learning Teachers Manual, 2nd Edition - Robert J. Marzano 2009-06

The premise of Dimensions of Learning an instructional framework founded on the best of what researchers and theorists know about learning is that five types, or dimensions, of thinking are essential to successful learning. These are (1) positive attitudes and perceptions about learning, (2) thinking involved in acquiring and integrating knowledge, (3) thinking involved in extending and refining knowledge, (4) thinking involved in using knowledge meaningfully, and (5) productive habits of mind. Dimensions of Learning is a valuable tool for reorganizing curriculum, instruction, and assessment. The authors discuss each of the five dimensions in detail and describe hundreds of teaching strategies that support them for example, how to help students construct meaning for declarative knowledge, internalize procedural

knowledge, and see the relevance of what they are expected to learn. The authors provide many examples at the elementary and secondary classroom levels. Teachers of grades K-12 can use this information to improve teaching and learning in any content area.

**Guerrilla Warfare** - Ernesto Che Guevara 2022-11-22

Che Guevara's classic text on revolutionary tactics and strategy. Since *Guerrilla Warfare* was first published in 1961, it has joined the canon of classic military literature, consulted by revolutionaries and counterrevolutionaries alike. In this book, Che Guevara outlines the lessons he learned as a guerrilla soldier in the Cuban revolution and explains how a small group of dedicated fighters grew in strength with the support of the Cuban people, overcoming the odds to vanquish the US-backed dictator's army and overthrow the dictatorship. *Guerrilla Warfare* is both an insightful account of one of the decisive revolutionary movements of the twentieth century and a timeless resource for freedom fighters the world over. This edition includes Che's corrections and his suggestions for further revisions to the text—revisions his murder in 1967 prevented him from making.

Radio Spectrum Management - Haim Mazar (Madjar) 2016-08-29

This book presents the fundamentals of wireless communications and services, explaining in detail what RF spectrum management is, why it is important, which are the authorities regulating the use of spectrum, and how is it managed and enforced at the international, regional and national levels. The book offers insights to the engineering, regulatory, economic, legal, management policy-making aspects involved. Real-world case studies are presented to depict the various approaches in different

countries, and valuable lessons are drawn. The topics are addressed by engineers, advocates and economists employed by national and international spectrum regulators. The book is a tool that will allow the international regional and national regulators to better manage the RF spectrum, and will help operators and suppliers of wireless communications to better understand their regulators.

*Echinoderm Research and Diversity in Latin America* - Juan José Alvarado 2012-08-07

This book compiles for the first time the development of echinoderm research in Latin America. The book contains 17 chapters, one introductory, 15 country chapters, and a final biogeographic analysis. It compiles all the investigations published in international and local journals, reports, theses and other gray literature. Each chapter is composed of 7 sections: introduction describes the marine environments, and main oceanographic characteristics, followed by a history of research account divided by specific subjects. The next section addresses patterns of distribution and diversity. A specific section would explain fishery or aquaculture activities. The next sections deal with environmental and anthropogenic threats that are affecting echinoderm, and any conservation or management action. Finally, a section with conclusions, needs and new lines of research. The book will include two appendixes with species lists of all echinoderms with bathymetric data, habitat and distribution.

**Cultural Diversity in the Armed Forces** - Joseph L. Soeters 2007-01-24

This volume explores ethnicity and gender developments in relation to the military. In some countries, the armed forces have a long history in responding to ethnic diversity, while elsewhere it has come up only recently as a policy issue. An even-handed representation of ethnic minorities in the military is recognized as crucial for enhancing its social legitimacy and professional quality. The same can be said about the integration of women in the military, which during a few decades across the board has grown into more than just another issue of personnel policies. Indeed with regard to gender, the symbolism and sensitivities

surrounding core identities are at stake - as with the presence of gays and lesbians in the military. Written by experts in the field, the chapters cover fourteen countries around the world: the USA, Canada, Bolivia, Ecuador, Brazil, South-Africa, Eritrea, India, Israel, Great Britain, France, Germany, Belgium and The Netherlands. Taken together, the armed forces of these countries offer a fascinating mix of similarities and differences in the ways they try to manage cultural diversity. Cultural Diversity in the Armed Forces will be of interest to students and scholars of military studies, sociology, gender and political science.
