Hitman's Journey Back in Time - Joshua

Schank 2015-02-20

A locked up former hitman (Ben) begins revealing his dark past to an unknown audience. The journey begins out innocently enough, with Ben as an eleven-year-old boy simply trying to fit in with the world. Ben, as a child, is very quiet, and because of this, makes himself an easy target for bullies. Ben's parents are also in the middle of a possible divorce. Despite Ben's troubles, many kids face these same challenges. Ben's world, however, would turn upside down when traumatizing things begin to happen. Things that no young boy should have to endure. Ben, looking for answers, decides to learn martial arts. Ben then turns to the Army for four years. Ben returns from the Army a much different person than before. Ben is completely fearless and has a sick sense of humor. Ben soon takes a job as a hitman. Though the mob boss sees enormous potential in Ben, not even he could foresee the animal Ben would become. Ben takes "hits" out on criminals that either did little time or no time at all. Ben doesn't want to just to give rapists, child molesters, and the like a quick death. Instead, he wants to send a message. The message is simple: By the time Ben is finishing up with them, they will wish that they had a choice to deal with the law enforcement instead.

Ischemia-reperfusion Injury of Skeletal Muscle - Gary A. Fantini 1994
This publication represents an up-to-date summary of the current understanding of reoxygenation injury in skeletal muscle and outlines future directions of those who will lead the way in this field. Skeletal muscle is generally more tolerant of ischemia reperfusion injury than other organ systems such as brain, heart, kidney, liver and bowel. Current knowledge regarding the pathophysiology of such injury has attracted correspondingly less attention and has been relatively slow to accumulate. This monograph brings together acknowledged leaders who have focused their research efforts on identifying mechanisms of reoxygenation injury in skeletal muscle; the virtual plethora of pathways and cytokines involved in the mediation of cellular injury is attested to by the number and diversity of chapters.

The White Coat Investor - James M. Dahle
2014-01

Written by a practicing emergency physician, *The White Coat Investor* is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highly-educated and extensively trained at making difficult diagnoses and performing life saving procedures. However, they receive little to no training in business, personal finance, investing, insurance, taxes, estate planning, and asset protection. This book fills in the gaps and will teach you to use your high income to escape from your student loans, provide for your family, build wealth, and stop getting ripped off by unscrupulous financial professionals. Straight talk and clear explanations allow the book to be easily digested by a novice to the subject matter yet the book also contains advanced concepts specific to physicians you won't find in other financial books. This book will teach you how to: Graduate from medical school with as little debt as possible Escape from student loans within two to five years of residency graduation Purchase the right types and amounts of insurance Decide when to buy a house and how much to spend on it Learn to invest in a sensible, low-cost and effective manner with or without the assistance of an advisor Avoid investments which are designed to be sold, not bought Select advisors who give great service and advice at a fair price Become a millionaire within five to ten years of residency graduation Use a "Backdoor Roth IRA" and "Stealth IRA" to boost your retirement funds and decrease your taxes Protect your hard-won assets from professional and personal lawsuits Avoid estate taxes, avoid probate, and ensure your children and your money go where you want when you die Minimize your tax burden, keeping more of your hard-earned money Decide between an employee job and an independent contractor job Choose between sole proprietorship, Limited Liability Company, S Corporation, and C Corporation Take a look at the first pages of the book by clicking on the Look Inside feature Praise For *The White Coat Investor* "Much of my financial planning practice is helping doctors to correct mistakes that reading this book would have avoided in the first

A \$500 House in Detroit - Drew Philp 2017-04-11
A young college grad buys a house in Detroit for \$500 and attempts to restore it—and his new neighborhood—to its original glory in this “deeply felt, sharply observed personal quest to create meaning and community out of the fallen...A standout” (Kirkus Reviews, starred review). Drew Philp, an idealistic college student from a working-class Michigan family, decides to live where he can make a difference. He sets his sights on Detroit, the failed metropolis of abandoned buildings, widespread poverty, and rampant crime. Arriving with no job, no friends, and no money, Philp buys a ramshackle house for five hundred dollars in the east side neighborhood known as Poletown. The roomy Queen Anne he now owns is little more than a clapboard shell on a crumbling brick foundation, missing windows, heat, water, electricity, and a functional roof. *A \$500 House in Detroit* is Philp’s raw and earnest account of rebuilding everything but the frame of his house, nail by nail and room by room. “Philp is a great storyteller...[and his] engrossing” (Booklist) tale is also of a young man finding his footing in the city, the country, and his own generation. We witness his concept of Detroit shift, expand, and evolve as his plan to save the city gives way to a

life forged from political meaning, personal connection, and collective purpose. As he assimilates into the community of Detroiters around him, Philp guides readers through the city's vibrant history and engages in urgent conversations about gentrification, racial tensions, and class warfare. Part social history, part brash generational statement, part comeback story, A \$500 House in Detroit "shines [in its depiction of] the 'radical neighborliness' of ordinary people in desperate circumstances" (Publishers Weekly). This is an unforgettable, intimate account of the tentative revival of an American city and a glimpse at a new way forward for generations to come.

[A Guide to Parking](#) - International Parking Institute 2018-05-30

If you own a car, use public transportation, go to work or school, use health care, shop or dine out, or are part of a metropolitan community, parking affects you, probably in more ways than you've thought about. Because parking has such a huge effect on what happens in cities and towns and how the greater transportation system functions, decision-makers are beginning to realize that it's critical to employ parking expertise at the beginning of the planning process. Designing and implementing an effective, professionally managed parking strategy can mean the difference between frustrating and costly traffic congestion and efficient, time-saving traffic flow. A Guide to Parking provides information on the current state of parking, providing professionals and students with an overview on major areas of parking and the transportation and mobility industry, punctuated by brief program examples.

Get Your Loved One Sober - Robert J Meyers
2009-07-30

The first general consumer book ever on the powerful, award-winning, scientifically proven new system of intervention that is turning the recovery field on its head. Historically there have been few options available for individuals seeking help for treatment-resistant loved ones suffering from substance abuse. Co-author Dr. Robert Meyers spent ten years developing a treatment program that helps Concerned Significant Others (CSOs) both improve the quality of their lives and to learn how to make treatment an attractive option for their partners who are substance abusers. *Get Your Loved One Sober* describes this multi-faceted program that uses supportive, non-confrontational methods to engage substance abusers into treatment. Called Community Reinforcement and Family Training (CRAFT), the program uses scientifically validated behavioral principles to reduce the loved one's substance use and to encourage him or her to seek treatment. Equally important, CRAFT also helps loved ones reduce personal stress and introduce meaningful, new sources of satisfaction into their life. Key Features: CRAFT is more effective than other types of interventions. This breakthrough new system is sweeping the recovery field. This is its first introduction to the general public. Contains simple exercises readers can practice at their own pace, with no costly or heart-breaking interventions. Proven successful for numerous

addictions, not just alcoholism.

The Sacrifice of Lester Yates - Robin Yocum
2021-04-27

A new political thriller from the author of bestselling novel *The Essay*. Lester Yates is the notorious Egypt Valley Strangler, one of the country's most prolific serial killers. Or, is he? Yates is two months from his date with the executioner when Ohio Attorney General Hutch Van Buren is presented with evidence that could exonerate him. But Yates is a political pawn, and forces exist that don't want him exonerated, regardless of the evidence. To do so could derail presidential aspirations and change the national political landscape. Yates' execution will clear a wide political path for many influential people, including Van Buren, who must battle both the clock and a political machine of which he is a part. Robin Yocum has been compared with E. Annie Proulx for his authenticity of place, and Elmore Leonard for his well-laid plots and perfect pacing. Arcade is thrilled to publish *The Sacrifice of Lester Yates*, which is Yocum at his best: suspenseful, political, and smart.

The Good Dream - Donna VanLiere 2012-07-03

In this full-length novel from the New York Times Bestselling author of *The Christmas Hope* series Donna VanLiere has written a beautifully rendered and poignant story about one woman's unlikely path to motherhood and the healing power of love. Tennessee, 1950: Still single and in her early thirties, Ivorie Walker is considered an old maid; a label she takes with good humor and a grain of salt. But when her mother dies, leaving her to live alone in the house she grew

up in, to work the farm she was raised to take care of, she finds herself lost in a kind of loneliness she hadn't expected. After years of rebuffing the advances of imperfect, yet eligible bachelors from her small town, Ivorie is without companionship with more love in her heart and time on her hands than she knows what to do with. But her life soon changes when a feral, dirty-faced boy who has been sneaking onto her land to steal from her garden comes into her life. Even though he runs back into the hills as quickly as he arrives, she's determined to find out who he is because something about the young boy haunts her. What would make him desperate enough to steal and eat from her garden? But what she can't imagine is what the boy faces, each day and night, in the filthy lean-to hut miles up in the hills. Who is he? How did he come to live in the hills? Where did he come from? And, more importantly, can she save him? As Ivorie steps out of her comfort zone to uncover the answers, she unleashes a firestorm in the town—a community that would rather let secrets stay that way. This pitch perfect story of redemption and the true meaning of familial love is Donna VanLiere at her very best.

Jeep - Patrick R. Foster 2020-01-14

The definitive, fully illustrated celebration of an auto manufacturer that paved its own way by going off-road is now updated to celebrate Jeep's 80th anniversary. Few American vehicles, or vehicles made anywhere else in the world for that matter, are as universally iconic as the Jeep. From olive drab WWII military relics to the beloved Wrangler with its rear-mounted spare tire, open-air design, and telltale roll cage, the Jeep is a true classic. In *Jeep: Eight Decades from Willys to Wrangler*, automotive writer Patrick R. Foster chronicles Jeep vehicle design and production from the beginning of World War II to present. Beginning with the Jeep as a crucial component of the American war fleet, Foster expertly recounts the corporate shifts, financial struggles and successes, close calls, and, above all, the enduring machines that have carried Jeep from the early 1940s to its triumphant role as a modern-day embodiment of American perseverance. More than 200 color and black-and-white historical photos and period advertisements complement his expertly written narrative of Jeep's entire history, now updated to

include five years of new model editions and prototypes, its return to the pickup market, and recent stunning marketplace successes. The resulting book reminds us that sometimes the road less traveled was just waiting for the right truck.

Keep Your Airspeed Up - Harold H. Brown
2017-08-08

Inspiring memoir of Colonel Harold H. Brown, one of the 930 original Tuskegee pilots, whose dramatic wartime exploits and postwar professional successes contribute to this extraordinary account. *Keep Your Airspeed Up: The Story of a Tuskegee Airman* is the memoir of an African American man who, through dedication to his goals and vision, overcame the despair of racial segregation to great heights, not only as a military aviator, but also as an educator and as an American citizen. Unlike other historical and autobiographical portrayals of Tuskegee airmen, Harold H. Brown's memoir is told from its beginnings: not on the first day of combat, not on the first day of training, but at the very moment Brown realized he was meant to be a pilot. He revisits his childhood in Minneapolis where his fascination with planes pushed him to save up enough of his own money to take flying lessons. Brown also details his first trip to the South, where he was met with a level of segregation he had never before experienced and had never imagined possible. During the 1930s and 1940s, longstanding policies of racial discrimination were called into question as it became clear that America would likely be drawn into World War II. The military reluctantly

allowed for the development of a flight-training program for a limited number of African Americans on a segregated base in Tuskegee, Alabama. The Tuskegee Airmen, as well as other African Americans in the armed forces, had the unique experience of fighting two wars at once: one against Hitler's fascist regime overseas and one against racial segregation at home. Colonel Brown fought as a combat pilot with the 332nd Fighter Group during World War II, and was captured and imprisoned in Stalag VII A in Moosburg, Germany, where he was liberated by General George S. Patton on April 29, 1945.

Upon returning home, Brown noted with acute disappointment that race relations in the United States hadn't changed. It wasn't until 1948 that the military desegregated, which many scholars argue would not have been possible without the exemplary performance of the Tuskegee Airmen.

[Pediatric Neuropsychiatry](#) - Aaron J. Hauptman 2018-10-26

Adult neuropsychiatry is now a well-established field with numerous reputable references. Practitioners who work with children routinely note how references and practitioners knowledgeable in the equivalent work in the pediatric world are rare. Child psychiatrists and neurologists frequently work with individuals struggling with these conditions and would strongly benefit from such a reference that incorporates medical work-up, psychopharmacological recommendations, family/support recommendations and theoretical pathophysiology. Pediatricians and developmental pediatricians often treat children with behavioral and neuropsychiatric sequelae, but are not well-trained in the neuropsychiatric management of these cases. Neuropsychologists and educational psychologists working with

children and adults with pediatric-onset conditions will also find the text helpful to contextualize their cases, better-understand the medical evaluation and management and perhaps adjust recommendations that would supplement their own testing methods. Finally, sub-specialists in adult neurology, psychiatry and neuropsychiatry often find themselves working with these children by default as there are few pediatric subspecialists who are available to accept them into practice. When facing complex neuropsychiatric illness in children, many clinicians are stymied because they may have "never seen a case like that". This text fills the wide gap that currently exists and helps move this field forward. The approach utilized in adult neuropsychiatry that is both clear and accessible does not yet have an equivalent in the pediatric realm, but there is tremendous interest in its development. Children and adolescents with neuropsychiatric conditions are very common and they and their caregivers often struggle to find professionals well educated in this field. Ultimately, a wide range of clinicians will find this text to be a very helpful resource for diagnosis and management in the spectrum of pediatric neuropsychiatric conditions. The case-based approach is also unique with respect to neuropsychiatric approaches, and the clear cut, reader-friendly approach of such a format would likely be well-received among physicians looking for a resource on this issue.

A Country of Cities - Vishaan Chakrabarti 2013 In *A Country of Cities*, author Vishaan Chakrabarti argues that well-designed cities are the key to solving America's great national challenges: environmental degradation, unsustainable consumption, economic stagnation, rising public health costs and decreased social mobility. If we develop them wisely in the future, our cities can be the force leading us into a new era of progressive and

prosperous stewardship of our nation. In compelling chapters, Chakrabarti brings us a wealth of information about cities, suburbs and exurbs, looking at how they developed across the 50 states and their roles in prosperity and globalization, sustainability and resilience, and health and joy. Counter to what you might think, American cities today are growing faster than their suburban counterparts for the first time since the 1920s. If we can intelligently increase the density of our cities as they grow and build the transit systems, schools, parks and other infrastructure to support them, Chakrabarti shows us how both job opportunities and an improved, sustainable environment are truly within our means. In this call for an urban America, he illustrates his argument with numerous infographics illustrating provocative statistics on issues as disparate as rising childhood obesity rates, ever-lengthening automobile commutes and government subsidies that favor highways over mass transit. The book closes with an eloquent manifesto that rallies us to build "a Country of Cities," to turn a country of highways, houses and hedges into a country of trains, towers and trees. Vishaan Chakrabarti is an architect, scholar and founder of PAU. PAU designs architecture that builds the physical, cultural, and economic networks of cities, with an emphasis on beauty, function and user experience. PAU simultaneously advances strategic urbanism projects in the form of master planning, tactical project advice and advocacy.

Private Equity Laid Bare - Ludovic Phalippou
2021-01-17

This is version 2.6 (Warning: Audiobook is following the first edition)! Designed for an MBA course on private equity, this textbook aims to familiarize any reader with the jargon and mechanics of private markets using simplified examples, real-life situations and results from thorough academic studies. The intention is to have a book that can be read more like a novel than like a regular textbook. In order to have long-lasting impact on readers, I believe in making things as simple as possible, boiling everything down to the essence, going straight to the point, and, most importantly, writing in an

informal and hopefully entertaining way. The objective is for the reader to open this book with anticipation of having a good educational time.

Stupid Things Parents Do to Mess Up Their Kids
- Dr. Laura Schlessinger 2001-06-05

Following her previous New York Times bestsellers, Dr. Laura Schlessinger, the conscience of talk radio, now addresses an issue near and dear to her heart: the stupid things parents do to mess up their children. Never one to shy away from tough truths, Dr. Laura marshals compelling evidence for the widespread neglect of America's children and convincingly condemns the numerous rationalizations to excuse it. These are just a few of her hard-hitting points: Don't Have Them If You Won't Raise Them: "The cavalier manner in which our society treats child care, not as a matter of intimacy and love, but as a matter of convenience and economics, is deeply destructive to our children's sense of attachment, identity, and importance." Dads Need Not Apply: "Single motherhood may be more acceptable to society, but it is not acceptable to children; nor is it in their best interest." Brave New Baby: "In our society, reproductive freedom means anyone can decide to create a life by any means with no, and I mean
