Millionaire by Thirty - Douglas R. Andrew 2008-04-30

Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing,

and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

History Digs - 2011-08-01

This series follows students who are learning to interpret historical sources from historians, museum curators, and other experts. While applying text prediction, purpose-driven research, and creative problem solving, readers learn how to ask historical questions about primary sources and events. Sidebars and back matter connect the historical event to contemporary times to show that history is alive and worthy of consideration. These books bring history to life; your students will be so captivated by the narratives, they will not realize how much they are learning!

Sick - Tom Leveen 2013-10-01

Brian and his friends are not part of the cool crowd. They're the misfits and the troublemakers—the ones who jump their high school's fence to skip class regularly. So when a deadly virus breaks out, they're the only ones with a chance of surviving. The virus turns Brian's classmates and teachers into bloodthirsty attackers who don't die easily. The whole school goes on lockdown, but Brian and his best friend, Chad, are safe (and stuck) in the theater department—far from Brian's sister, Kenzie, and his ex-girlfriend with a panic attack problem, Laura. Brian and Chad, along with some of the theater kids Brian had never given the time of day before, decide to find the girls and bring them to the safety of the theater. But it won't be easy, and it will test everything they thought they knew about themselves and their classmates. Praise for SICK "The gore and action will leave enthralled readers thrilled and then sated with each kill on either side." —Booklist "Between the pacing and the heroes' salty, blue language (full of lovingly creative, genital-inspired insults), reluctant readers who love zombies will devour it, right up to the abrupt end." —Kirkus Reviews "Sick is well written, with great detail, even if it is a little gory." —VOYA Magazine Awards 2014 Quick Picks for Reluctant Young Readers list from YALSA

Teacher Induction and Mentoring - Juanjo Mena 2021-12-22

This book draws together various theoretical and research-based perspectives to examine the institutionalization of mentoring processes for beginning teachers. Teacher induction, defined as the guidance provided to new teachers, is increasingly gaining traction as a key stage in promoting quality education. Major efforts have been put into reducing transitional challenges from being a student teacher to a practicing teacher; optimizing professional relationships and socialization into school dynamics; and increasing teacher retention. Mentoring has been proven to add benefits in assisting beginning teachers during the early years of their teaching career, because it provides the required knowledge and skills to face uncertain school scenarios and the complexities of practice. However, teacher induction programs are not part of regular instruction in many countries. The lack of teacher training during the induction phase might result in lower levels of commitment, professional isolation, or even attrition. This book calls for more concrete mentoring processes for early career teachers, and questions how this can be put into practice.

The Framework for Teaching Evaluation Instrument, 2013 Edition - Charlotte Danielson 2013

The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements)

have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

Beyond Training - Jack C. Richards 1998-02-13

Beyond Training examines the nature of second language teacher development and how teachers' practices are influenced by their beliefs and principles. It seeks to move discussion of language teacher development beyond the level of "training," which reflects a technical view of specific teaching practices. Instead, it takes a more holistic approach to teacher development built on the notion of the teacher as critical and reflective thinker. The argument pursued throughout is that teacher education needs to engage teachers not merely in the mastery of techniques, but in an exploration of the knowledge, beliefs, and attitudes that underly their teaching practices.

Speed Mathematics - Bill Handley 2011-01-07

Using this book will improve your understanding of math and have you performing like a genius! People who excel at mathematics use better strategies than the rest of us; they are not necessarily more intelligent. Speed Mathematics teaches simple methods that will enable you to make lightning calculations in your head-including multiplication, division, addition, and subtraction, as well as working with fractions, squaring numbers, and extracting square and cube roots. Here's just one example of this revolutionary approach to basic mathematics: $96 \times 97 =$ Subtract each number from 100. $96 \times 97 = 4\ 3$ Subtract diagonally. Either $96--3$ or $97--4$. The result is the first part of the answer. $96 \times 97 = 93\ 4\ 3$ Multiply the numbers in the circles. $4 \times 3 = 12$. This is the second part of the answer. $96 \times 97 = 9312\ 4\ 3$ It's that easy!

Classroom Management that Works - Robert J. Marzano 2009

"In this follow-up to What Works in Schools, Robert J. Marzano analyzes research from more than 100 studies on classroom management to discover the answers to these questions and more. He then applies these findings to a series of "Action Steps"-specific strategies that educators can use to: get the classroom management effort off to a good start, establish effective rules and procedures, implement appropriate disciplinary interventions, foster productive student-teacher relationships, develop a positive "mental set", help students contribute to a positive learning environment, and activate schoolwide measures for effective classroom management. Marzano and his co-authors Jana S. Marzano and Debra J. Pickering provide real stories of teachers and students in classroom situations to help illustrate how the action steps can be used successfully in different situations. In each chapter, they also review the strengths and weaknesses of programs with proven track records."--Cover.

Precalculus - Ron Larson 2008

Cold War & 1950s - 2007

"Involving students in real historical problems that convey powerful lessons about U.S. history, these thought-provoking activities combine core content with valuable practice in decision making, critical thinking, and understanding multiple perspectives. O'Reilly - an experienced, award winning teacher - has students tackle fascinating historical questions that put students in the shoes of a range of people from the past, from the rich and famous to ordinary citizens. Each lesson can be done either as an in-depth activity or as a "quick motivator." Detailed teacher pages give step-by-step instructions, list key vocabulary terms, offer troubleshooting tips, present ideas for post-activity discussions, and furnish lists of related sources. Reproducible student handouts clearly lay out the decision-making scenarios, provide "outcomes," and present related primary source readings and/or images with analysis questions"--Page 4 of cover

Disciple IV - Abingdon Press 2005-05

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study

concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.
