The Science of Musical

Sound - William Ralph Bennett

Jr. 2018-09-04

This textbook is a product of William Bennett's work in developing and teaching a course on the physics of music at Yale University to a diverse audience of musicians and science students in the same class. The book is a culmination of over a decade of teaching the course and weaves together historical descriptions of the physical phenomena with the author's clear interpretations of the most important aspects of the science of music and musical instruments. Many of the historical examples are not found in any other textbook available on the market. As the co-inventor of the Helium-Neon laser, Prof. Bennett's knowledge of physics was world-class. As a professor at one of the most prestigious liberal-arts universities in the world, his appreciation for culture and humanities shines through. The book covers the basics of oscillations, waves and the analysis techniques necessary for understanding how musical instruments work.

All types of stringed instruments, pipe organs, and the human voice are covered in this volume. A second volume covers the remaining families of musical instruments as well as selected other topics. Readers without a background in acoustics will enjoy learning the physics of the Science of Musical Sound from a preeminent scientist of the 20th century. Those well versed in acoustics will discover wonderful illustrations and photographs depicting familiar concepts in new and enlightening ways.

How to Be a Muslim - Haroon Moghul 2017-06-06

A young Muslim leader's memoir of his struggles to forge an American Muslim identity Haroon Moghul was thrust into the spotlight after 9/11, becoming an undergraduate leader at New York University's Islamic Center forced into appearances everywhere: on TV, before interfaith audiences, in print. Moghul was becoming a prominent voice for American Muslims even as he struggled with his relationship to Islam. In high school he was barely a believer and entirely convinced he was going to hell. He sometimes drank. He didn't pray regularly. All he wanted was a girlfriend. But as he discovered, it wasn't so easy to leave religion behind. To be true to himself, he needed to forge a unique American Muslim identity that reflected his beliefs and personality.

How to Be a Muslim reveals a young man coping with the crushing pressure of a world that fears Muslims, struggling with his faith and searching for intellectual forebears, and suffering the onset of bipolar disorder. This is the story of the second-generation immigrant, of what it's like to lose yourself between cultures and how to pick up the pieces.

Ducati Desmoquattro Superbikes - Ian Falloon
2002-06

Ducati stunned the world in 1988 when the struggling, small Italian firm unleashed its Desmoquattro -- 8-valve, desmodromic -- Superbike. The bike found success on the world's racetracks right from the start. Road-going versions soon carried that success to the general public, proving this design wasn't just another noisy prototype. The Superbikes -- 748, 851, 888, 916, and 996 -- are now Ducati's best-selling machines

in the United States; and the Desmoquattro engine found its way into the company's more pedestrian series such as the Monster roadster and ST4 sport-tour. This is the comprehensive volume on Ducati's ultimate performance motorcycles and replaces the out-of-print Ducati Super Bikes: 851, 888, 916.
