Building Bottom-up Health and Disaster Risk Reduction Programmes -

Emily Ying Yang Chan 2017-12-08

As a backdrop of the Sustainable Development Goals (SDGs) (2016-2030), the United Nations pointed out that more than 6 million

children still died before the age of five by 2015. At least 1.8 billion people across the world still consumed fecally contaminated drinking water and 2.4 million lacked access to basic sanitation services such as toilets or latrines, while nearly 1,000 children died every day of preventable water and sanitation-related diarrhoeal diseases. Rural areas fare far worse: Children in rural areas are about 1.7 times more likely to die before their fifth birthday as those in urban areas. About 16 per cent of the rural population do not use improved drinking water sources, compared to 4 per cent of the urban population. About 50 per cent of people living in rural areas lack improved sanitation facilities, compared to only 18 per cent of people in urban areas. Far too many one-off rural on-site public health knowledge transfer projects fail to deliver results in the long run, and the knowledge in question cannot be retained in the rural communities after the NGO and development workers are gone. In addition to external constraints, this is often due to a lack of theoretical understanding among NGO practitioners and volunteers and basis for evaluation and improvement of health relief programmes. Based on public health theories and illustrated by relevant examples, this book introduces how health, emergency and disaster preparedness education programmes could be organised in remote rural Asia, which could become useful reference materials for organisers and volunteers of rural development projects. This book is an introductory to intermediate level textbook and reference book for healthcare professionals, fieldworkers, volunteers and students who are interested in promoting health and emergency and disaster risk reduction. The book is developed from the experience and insights gained from the long-established CCOUC Ethnic Minority Health Project in China. It also incorporates new lessons from CCOUC's recent projects in Asia countries like Bhutan, Nepal and Democratic People's Republic of Korea.

Research Anthology on Digital Transformation, Organizational Change, and the Impact of Remote Work - Management Association, Information Resources 2020-10-30

As the use of remote work has recently skyrocketed, digital transformation within the workplace has gone under a microscope, and it

has become abundantly clear that the incorporation of new technologies in the workplace is the future of business. These technologies keep businesses up to date with their capabilities to perform remote work and make processes more efficient and effective than ever before. In understanding digital transformation in the workplace there needs to be advanced research on technology, organizational change, and the impacts of remote work on the business, the employees, and day-to-day work practices. This advancement to a digital work culture and remote work is rapidly undergoing major advancements, and research is needed to keep up with both the positives and negatives to this transformation. The Research Anthology on Digital Transformation, Organizational Change, and the Impact of Remote Work contains hand-selected, previously published research that explores the impacts of remote work on business workplaces while also focusing on digital transformation for improving the efficiency of work. While highlighting work technologies, digital practices, business management, organizational change, and the effects of remote work on employees, this book is an all-encompassing research work intended for managers, business owners, IT specialists, executives, practitioners, stakeholders, researchers, academicians, and students interested in how digital transformation and remote work is affecting workplaces.

Mismanagement in African Governments - Dr. Alain Mortha 2016-03-31

This book emanates from the authors doctoral dissertation research that explored African government mismanagement practices by focusing on the pilot case study of Chad in Central Africa. Two of Chads positions that are most bothersome and disconcerting to the author are least favorable place in the world to conduct business according to the World Bank and one of twenty countries in the world where corruption is most

existent as adjudged by Transparency International. Being born and raised in Chad, the author was so shocked by these statistics that his chief desire in writing this book is to propose some sort of solution that may help African countries enhance the management of public resources rather than pointing a finger of blame. A comparative investigation of the management practices during the autocratic regime of former president Hissein Habr and the democratic regime of current president Idriss Dby Itno was conducted. This book begins with an overview of previous Chadian governments, the history of corruption in Chad, and a description of mismanagement practices during the regimes of Habr and Dby as revealed through research. An overview of the mismanagement practices in Sub-Sahara African governments also illustrates the similarities between Chad and these countries. The author provides a theoretical framework used to conduct his research as well as several leadership models that he believes would be useful for African governments. The book ends with the authors proposed customized Scholar-Practitioner-Leader (SPL) model based on ethics and TQM to enhance the management of public resource, and a discussion about the limits of his research plus recommendations for future research. The results of the study were shocking to say the least and raised questions about the viability of the Occidental democracy imposed in Africa by developed countries. Will some African countries be better off with a benevolent dictatorship rather than a democratic regime? Find more in the book.

Thinking in Systems - Donella Meadows 2008-12-03

In the years following her role as the lead author of the international bestseller, *Limits to Growth*—the first book to show the consequences of unchecked growth on a finite planet— Donella Meadows remained a pioneer of environmental and social analysis until her untimely death in 2001. *Thinking in Systems*, is a concise and crucial book offering insight for problem solving on scales ranging from the personal to the global. Edited by the Sustainability Institute's Diana Wright, this essential primer brings systems thinking out of the realm of computers and equations and into the tangible world, showing readers how to develop

the systems-thinking skills that thought leaders across the globe consider critical for 21st-century life. Some of the biggest problems facing the world—war, hunger, poverty, and environmental degradation—are essentially system failures. They cannot be solved by fixing one piece in isolation from the others, because even seemingly minor details have enormous power to undermine the best efforts of too-narrow thinking. While readers will learn the conceptual tools and methods of systems thinking, the heart of the book is grander than methodology. Donella Meadows was known as much for nurturing positive outcomes as she was for delving into the science behind global dilemmas. She reminds readers to pay attention to what is important, not just what is quantifiable, to stay humble, and to stay a learner. In a world growing ever more complicated, crowded, and interdependent, *Thinking in Systems* helps readers avoid confusion and helplessness, the first step toward finding proactive and effective solutions.

Management of Human Service Programs - Judith A. Lewis
2011-08-15

This book introduces students to the theory and practice of managerial and leadership functions, with a practical approach that provides important guidelines for working within agencies. The authors address important topics germane to management and administration, including

evidence-based and empirically supported practice, challenges of management, environments of human service agencies, program design, organizational theory and design, human resources, supervisory relationships, finances, information systems, program evaluation, organizational change, leadership, and achieving and maintaining organizational excellence. To help illustrate specific issues, the authors have included case examples throughout the text. In addition, a new running case set at the Grandview Community Center helps students see each issue more clearly because it takes place against the backdrop of a single setting. Reflection questions encourage students to consider how they would handle the scenario. Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book

provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Be the Change - Keely Rees 2022-10-25

"Have you ever witnessed or experienced something and thought, "This isn't right! Someone needs to do something about it!"? This is exactly how advocacy begins. Even if you've never considered yourself an advocate, advocacy is for everyone. If you have ever signed a petition to show your support for a cause, or spoken out about something you felt people should better understand- that's advocacy! Advocacy can take many forms-from voting in an election, to raising awareness, to organizing a campaign for change-or leading an entire movement. It happens at multiple levels, from local to global. It's democracy in action"-

Rules for Radicals - Saul Alinsky 2010-06-30

First published in 1971, Rules for Radicals is Saul Alinsky's impassioned counsel to young radicals on how to effect constructive social change and know "the difference between being a realistic radical and being a rhetorical one." Written in the midst of radical political developments whose direction Alinsky was one of the first to question, this volume exhibits his style at its best. Like Thomas Paine before him, Alinsky was able to combine, both in his person and his writing, the intensity of political engagement with an absolute insistence on rational political discourse and adherence to the American democratic tradition.

The Adult Learner - Malcolm S. Knowles 2020-12-21

How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of The Adult Learner has been revised to include: Updates to the book to reflect

the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.
