Beating the Street - Peter Lynch 2012-03-13
Legendary money manager Peter Lynch explains his own strategies for investing and offers advice for how to pick stocks and mutual funds to assemble a successful investment portfolio. Develop a Winning Investment Strategy—with Expert Advice from “The Nation’s #1 Money Manager.” Peter Lynch’s “invest in what you know” strategy has made him a household name with investors both big and small. An important key to investing, Lynch says, is to remember that stocks are not lottery tickets. There’s a company behind every stock and a reason companies—and their stocks—perform the way they do. In this book, Peter Lynch shows you how you can become an expert in a company and how you can build a profitable investment portfolio, based on your own experience and insights and on straightforward do-it-yourself research. In *Beating the Street*, Lynch for the first time explains how to devise a mutual fund strategy, shows his step-by-step strategies for picking stock, and describes how the individual investor can improve his or her investment performance to rival that of the experts. There’s no reason the individual investor can’t match wits with the experts, and this book will show you how.

City - Douglas W. Rae 2008-10-01

How did neighborhood groceries, parish halls, factories, and even saloons contribute more to urban vitality than did the fiscal might of

postwar urban renewal? With a novelist's eye for telling detail, Douglas Rae depicts the features that contributed most to city life in the early "urbanist" decades of the twentieth century. Rae's subject is New Haven, Connecticut, but the lessons he draws apply to many American cities. *City: Urbanism and Its End* begins with a richly textured portrait of New Haven in the early twentieth century, a period of centralized manufacturing, civic vitality, and mixed-use neighborhoods. As social and economic conditions changed, the city confronted its end of urbanism first during the Depression, and then very aggressively during the mayoral reign of Richard C. Lee (1954-70), when New Haven led the nation in urban renewal spending. But government spending has repeatedly failed to restore urban vitality. Rae argues that strategies for the urban future should focus on nurturing the unplanned civic engagements that make mixed-use city life so appealing and so civilized. Cities need not reach their old peaks of population, or look like thriving suburbs, to be once again splendid places for human beings to live and work.

Three Cups of Tea - Greg Mortenson
2006-03-02

The astonishing, uplifting story of a real-life Indiana Jones and his humanitarian campaign to use education to combat terrorism in the Taliban's backyard Anyone who despairs of the individual's power to change lives has to read the story of Greg Mortenson, a homeless mountaineer who, following a 1993 climb of Pakistan's treacherous K2, was inspired by a chance encounter with impoverished mountain villagers and promised to build them a school. Over the next decade he built fifty-five schools—especially for girls—that offer a balanced education in one of the most isolated and dangerous regions on earth. As it chronicles Mortenson's quest, which has brought him into conflict with both enraged Islamists and uncomprehending Americans, *Three Cups of Tea* combines adventure with a celebration of the humanitarian spirit.

The Millionaire Next Door - Thomas J. Stanley
2010-11-30

How do the rich get rich? An updated edition of the "remarkable" New York Times bestseller, based on two decades of research (The

Washington Post). Most of the truly wealthy in the United States don't live in Beverly Hills or on Park Avenue. They live next door. America's wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don't realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as "rich" are actually a tiny minority of America's truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, *The Millionaire Next Door* was a groundbreaking examination of America's rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the financial crash and the twenty-first century. "Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today's earn-and-consume culture." —Library Journal

Lean Thinking was launched in the fall of 1996, just in time for the recession of 1997. It told the story of how American, European, and Japanese firms applied a simple set of principles called 'lean thinking' to survive the recession of 1991 and grow steadily in sales and profits through 1996. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and more efficient. Now we are dealing with the recession of 2001 and the financial meltdown of 2002. So what happened to the exemplar firms profiled in Lean Thinking? In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.

Brands of Faith - Mara Einstein 2007-09-14

In a society overrun by commercial clutter, religion has become yet another product sold in the consumer marketplace, and faiths of all kinds must compete with a myriad of more entertaining and more convenient leisure activities. Brands of Faith argues that in order to compete effectively faiths have had to become brands - easily recognizable symbols and spokespeople with whom religious prospects can make immediate connections Mara Einstein shows how religious branding has expanded over the past twenty years to create a blended world of commerce and faith where the sacred becomes secular and the secular sacred. In a series of fascinating case studies of faith brands, she explores the significance of branded church courses, such as Alpha and The Purpose Driven

Life, mega-churches, and the popularity of the televangelist Joel Olsteen and television presenter Oprah Winfrey, as well as the rise of Kaballah. She asks what the consequences of this religious marketing will be, and outlines the possible results of religious commercialism - good and bad. Repackaging religion - updating music, creating teen-targeted bibles - is justifiable and necessary. However, when the content becomes obscured, religion may lose its unique selling proposition - the very ability to raise us above the market.
