A Purposive Approach to Labour Law - Guy Davidov 2016-05-05

The mismatch between goals and means is a major cause of crisis in labour law. The regulations that we use - the legal instruments and techniques - are no longer in sync with the goals they are supposed to advance. This

mismatch leads to a problem of coverage, where many workers who need the protection of labour law are not covered by it, as well as a problem of obsolescence, as labour laws are not sufficiently updated in light of dramatic changes in the labour market. Adopting a purposive approach to interpretation and legislative reform, this

volume addresses this crisis of mismatch. It first articulates the goals of labour law, both general and specific, through an in-depth normative discussion and a consideration of critiques. The book then proceeds to reconsider our means, asking what we need to change or improve in the laws themselves in order to better advance the goals. Some of the proposed solutions are at the level of judicial interpretation, others at the legislative level. The book offers several examples of the way a purposive analysis should be performed in concrete cases. It also recommends institutional structures that are suited to ongoing adaptation of the law to ensure that our goals are advanced even when circumstances frequently change. Finally, in response to the crisis of enforcement in this field, which frustrates the achievement of labour law's goals, several proposals to improve compliance and enforcement are considered.

Schools and Societies - Steven Brint 2017-01-04

Schools and Societies provides a synthesis of key issues in the sociology of education, focusing on American schools while offering a global, comparative context. Acknowledged as a standard text in its first two editions, this fully revised and updated third edition offers a broader sweep, stronger theoretical foundation, and a new concluding chapter on the

possibilities of schooling. Subsequent chapters compare schooling in industrialized and developing countries, and discuss the major purposes of schooling: transmitting culture, socializing young people, and sorting youth for class locations and occupations. The penultimate chapter looks at school reform efforts, drawing for the first time on comparative studies. A new coda ends the book by considering the educational ideals schools should strive for and how they might be attained. Scholarship Reconsidered - Ernest L. Boyer
2015-10-06

Shifting faculty roles in a changing landscape
Ernest L. Boyer's landmark book *Scholarship Reconsidered: Priorities of the Professoriate* challenged the publish-or-perish status quo that dominated the academic landscape for generations. His powerful and enduring argument for a new approach to faculty roles and rewards continues to play a significant part of the national conversation on scholarship in the academy. Though steeped in tradition, the role of faculty in the academic world has shifted significantly in recent decades. The rise of the non-tenure-track class of professors is well documented. If the historic rule of promotion and tenure is waning, what role can scholarship play in a fragmented, unbundled academy? Boyer offers a still much-needed approach. He calls for a broadened view of scholarship,

audaciously refocusing its gaze from the tenure file and to a wider community. This expanded edition offers, in addition to the original text, a critical introduction that explores the impact of Boyer's views, a call to action for applying Boyer's message to the changing nature of faculty work, and a discussion guide to help readers start a new conversation about how *Scholarship Reconsidered* applies today.

Beyond the Skills Gap - Matthew T. Hora

2019-01-02

How can educators ensure that young people who attain a postsecondary credential are adequately prepared for the future? Matthew T. Hora and his colleagues explain that the answer is not simply that students need more

specialized technical training to meet narrowly defined employment opportunities. Beyond the Skills Gap challenges this conception of the “skills gap,” highlighting instead the value of broader twenty-first-century skills in postsecondary education. They advocate for a system in which employers share responsibility along with the education sector to serve the collective needs of the economy, society, and students. Drawing on interviews with educators in two- and four-year institutions and employers in the manufacturing and biotechnology sectors, the authors demonstrate the critical importance of habits of mind such as problem solving, teamwork, and communication. They go on to show how faculty and program administrators can create active learning experiences that develop students’ skills across a range of domains. The book includes in-depth descriptions of eight educators whose classrooms exemplify the effort to blend technical learning with the cultivation of twenty-

The Lawyer Bubble - Steven Harper

2016-03-08

A noble profession is facing its defining moment. From law schools to the prestigious firms that represent the pinnacle of a legal career, a crisis is unfolding. News headlines tell part of the story—the growing oversupply of new lawyers, widespread career dissatisfaction, and spectacular implosions of pre-eminent law firms. Yet eager hordes of bright young people continue to step over each other as they seek jobs with high rates of depression, life-consuming hours, and little assurance of financial stability. The Great Recession has only

worsened these trends, but correction is possible and, now, imperative. In *The Lawyer Bubble*, Steven J. Harper reveals how a culture of short-term thinking has blinded some of the nation's finest minds to the long-run implications of their actions. Law school deans have ceded independent judgment to flawed U.S. News & World Report rankings criteria in the quest to maximize immediate results. Senior partners in the nation's large law firms have focused on current profits to enhance American Lawyer rankings and individual wealth at great cost to their institutions. Yet, wiser decisions—being honest about the legal job market, revisiting the financial incentives currently driving bad behavior, eliminating the billable hour model, and more—can take the profession to a better place. A devastating indictment of the greed, shortsightedness, and dishonesty that now permeate the legal profession, this insider account is essential reading for anyone who wants to know how things went so wrong and

how the profession can right itself once again. *The Official ACT Prep Guide 2020 - 2021, (Book + 5 Practice Tests + Bonus Online Content) - ACT 2020-04-21*

Conform - Glenn Beck 2014-05-06

#1 bestselling author and popular radio and television host Glenn Beck considers the hot-button issue of education in the US, exposing the weaknesses of the Common Core school curriculum and examining why liberal solutions fail. Public education is never mentioned in the constitution. Why? Because our founders knew

that it was an issue for state and local governments—not the federal one. It's not a coincidence that the more the federal government has inserted itself into public education over the years, the worse our kids have fared. Washington dangles millions of dollars in front of states and then tells them what they have to do to get it. It's backdoor nationalization of education—and it's leading us to ruin. In *Conform*, Glenn Beck presents a well-reasoned, fact-based analysis that proves it's not more money our schools need—it's a complete refocusing of their priorities and a total restructuring of their relationship with the federal government. In the process, he dismantles many of the common myths and talking points that are often heard by those who want to protect the status quo. Critics of the current system are just "teacher bashers"...Teachers' unions put kids first...Homeschooled kids suffer both academically and socially..."local control" is an

excuse to protect mediocrity...Common Core is “rigorous” and “state led”...Critics of Common Core are just conspiracy theorists...Elementary school teachers need tenure...We can’t reform schools until we eradicate poverty...school choice takes money away from public schools...Charter schools perform poorly relative to public schools. There is no issue more important to America’s future than education. The fact that we’ve yielded control over it to powerful unions and ideologically driven elitists is inexcusable. We are failing ourselves, our children, and our country. Conform gives parents the facts they need to take back the debate and help usher in a new era of education built around the commonsense principles of choice, freedom, and accountability.

Power, Legal Education, and Law School Cultures - Meera E. Deo 2019-11-05

There is a myth that lingers around legal education in many democracies. That myth would have us believe that law students are admitted and then succeed based on raw merit, and that law schools are neutral settings in which professors (also selected and promoted based on merit) use their expertise to train those students to become lawyers. Based on original, empirical research, this book investigates this myth from myriad perspectives, diverse settings, and in different nations, revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education. Embedded within law school cultures are assumptions that also stymie efforts at reform. The book examines hidden pedagogical messages, showing how presumptions about theory's relation to practice are refracted

through the obfuscating lens of curricula. The contributors also tackle questions of class and market as they affect law training. Finally, this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open, revealing common dynamics across cultural and institutional forms. The chapters speak to similar issues and to one another about the influence of context, images of law and lawyers, the political economy of legal education, and the agency of students and faculty.

The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable

best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
