number of key settings. The book is intended as a specialist reading and teaching resource for courses on media, politics, citizenship, activism, social movements, public policy, and communication.

News, Gender and Power - Stuart Allan

2002-01-31
How do gender relations affect the practice of journalism? Despite the star status accorded to some women reporters, and the dramatic increase in the number of women working in journalism, why do men continue to occupy most senior management positions? And why do female readers, viewers and listeners remain as elusive as ever? News, Gender and Power addresses the pressing questions of how gender shapes the forms, practice, institutions and audiences of journalism. The contributors, who include John Hartley, Pat Holland, Jenny Kitzinger and Myra Macdonald, draw on feminist theory and gender-sensitive critiques to explore media issues such as: * ownership and control * employment and occupation status * the representation of women in the media * the sexualization of news and audience research. Within this framework the contributors explore media coverage of: * the trial of O. J. Simpson * British beef and the BSE scandal * the horrific

crimes of Fred and Rosemary West * child sexual abuse and false memory syndrome * the portrayal of women in TV documentaries such as Modern Times and Cutting Edge.

No Longer Newsworthy - Christopher R. Martin 2019-05-15
Until the recent political shift pushed workers back into the media spotlight, the mainstream media had largely ignored this significant part of American society in favor of the moneyed "upscale" consumer for more than four decades. Christopher R. Martin now reveals why and how the media lost sight of the American working class and the effects of it doing so. The damning indictment of the mainstream media that flows through No Longer Newsworthy is a wakeup call about the critical role of the media in telling news stories about labor unions, workers, and working-class readers. As Martin charts the decline of labor reporting from the late 1960s onwards, he reveals the shift in news coverage as the mainstream media abandoned labor in favor of consumer and business interests. When newspapers, especially, wrote off working-class readers as useless for their business model, the American worker became invisible. In No Longer Newsworthy, Martin covers this shift in focus, the loss of political voice for the working class, and the emergence of a more conservative media in the form of Christian television, talk radio, Fox News, and conservative websites. Now, with our fractured society and news media, Martin offers the mainstream media recommendations for how to push back against right-wing media and once again embrace the working class as critical to its audience and its democratic function.

Gifted Tongues - Gary Alan Fine 2010-07-01
Learning to argue and persuade in a highly competitive environment is only one aspect of life on a high-school debate team. Teenage debaters also participate in a distinct cultural world--complete with its own jargon and status system--in which they must negotiate

complicated relationships with teammates, competitors, coaches, and parents as well as classmates outside the debating circuit. In Gifted Tongues, Gary Alan Fine offers a rich description of this world as a testing ground for both intellectual and emotional development, while seeking to understand adolescents as social actors. Considering the benefits and drawbacks of the debating experience, he also recommends ways of reshaping programs so that more high schools can use them to boost academic performance and foster specific skills in citizenship. Fine analyzes the training of debaters in rapid-fire speech, rules of logical argumentation, and the strategic use of evidence, and how this training instills the core values of such American institutions as law and politics. Debates, however, sometimes veer quickly from fine displays of logic to acts of immaturity--a reflection of the tensions experienced by young people learning to think as adults. Fine contributes to our understanding of teenage years by encouraging us not to view them as a distinct stage of development but rather a time in which young people draw from a toolkit of both childlike and adult behaviors. A well-designed debate program, he concludes, nurtures the intellect while providing a setting in which teens learn to make better behavioral choices, ones that will shape relationships in their personal, professional, and civic lives.

Grammaire de L'ancien Provençal - Joseph Anglade 1921

Independent Component Analysis of Edge Information for Face Recognition - Kailash

Jagannath Karande 2013-07-15
The book presents research work on face recognition using edge information as features for face recognition with ICA algorithms. The independent components are extracted from edge information. These independent components are used with classifiers to match the facial images for recognition purpose. In their study, authors have explored Canny and LOG edge detectors as standard edge detection methods. Oriented Laplacian of Gaussian (OLOG) method is explored to extract the edge information with different orientations of Laplacian pyramid. Multiscale wavelet model for edge detection is also proposed to extract edge information. The book provides insights for advance research work in the area of image processing and biometrics.

Advertising in MENA Goes Digital - Ilhem Allagui 2019-04-04
An inside story of local, regional and global advertising in the Middle East. Grounded in empirical research and theories, this book explores the evolution of advertising practices, audiences, digital media and communication technologies in increasingly complex MENA environments. Advertising in MENA Goes Digital draws on empirical research and theories to explore how the adoption of digital technology in the Middle East and North Africa, through information and communication technologies, social media and mobile, have shaped creative advertising solutions. Through key case studies of marketing in the pan-Arab market from regional and global brands as Procter & Gamble, Olay, Vimto, and MTV Arabia, the book sheds light on the intricate relationship between technological and societal development and advertising practice. It examines cultural constituents such as humor, religion and gender, political advertising driven by the new wave of democracy in the region and digital activism, technological and digital transformations and the economic ways advertising support new

media start-ups. Supported by examples and campaigns, the book discusses the way global or regional brands standardized or localized their messaging while adopting international techniques but market-oriented solutions. The book will key reading for scholars and students in advertising, marketing, business, journalism, cultural studies and media in addition to Middle East Studies. It is also an essential text for media and marketing communication industry professionals, and will appeal to those interested in the global-local dichotomy and promotional communications.

Robert Taylor - Gillian Kelly 2019-06-27 Because of his lengthy screen resume that includes almost eighty appearances in such movies as Camille and Waterloo Bridge, as well as a marriage and divorce to actress Barbara Stanwyck, Robert Taylor was a central figure of Hollywood's classical era. Despite this, he can be regarded as a "lost" star, an interesting contradiction given the continued success he enjoyed during his lifetime. In Robert Taylor: Male Beauty, Masculinity, and Stardom in Hollywood, author Gillian Kelly investigates the initial construction and subsequent developments of Taylor's star persona across his thirty-five-year career. By examining concepts of male beauty, men as object of the erotic gaze, white American masculinity, and the unusual longevity of a career initially based on looks, Kelly highlights how gender, masculinity, and male stars and the ageing process affected Taylor's career. Placing Taylor within the histories of both Hollywood's classical era and mid-twentieth-century America, this study positions him firmly within the wider industrial, cultural, and socioeconomic contexts in which he worked. Kelly examines Taylor's film and television work as well as ephemeral material, such as fan magazines, to assess how his on- and off-screen personas were created and developed over time. Taking a mostly chronological approach, Kelly places Taylor's persona within

specific historical moments in order to show the complex paradox of his image remaining consistently recognizable while also shifting seamlessly within the Hollywood industry. Furthermore, she explores Taylor's importance to Hollywood cinema by demonstrating how a star persona like his can "fit" so well, and for so long, that it almost becomes invisible and, eventually, almost forgotten.

Reporting China on the Rise - Yuan Zeng 2019-03-26
Drawing on the structural-constructivist

framework of journalistic field and habitus, Reporting China on the Rise examines the internal and external dynamics which are shaping the work of foreign correspondents in China during Xi Jinping's tenure. This study presents findings from extensive surveys and interviews with current and former correspondents based in China. It aims to explore how they have responded, and continue to respond, to pressures from within the journalistic field (such as a transforming media industry), as well as from constant shifts in global geopolitics, and China's increasingly restrictive journalistic environment. These factors are shown to work together to relationally define the news production practice of these correspondents and, ultimately, shape the final news product. Journalism in modern China has become a widely discussed, yet gravely under-researched topic, both for policy-makers and academics. Reporting China on the Rise seeks to open up discussions around the role of the foreign press in generating meaningful media coverage of this growing superpower. It will be an invaluable resource for students and researchers of Journalism and Media Studies.

Experiences from various locations in several sub-Saharan African countries have been

carefully selected in this collection with the aim of providing an updated account on the digital divide and its impact in Africa.

Political Communication - Aeron Davis 2019-05-29
We are living in a period of great uncertainty. Votes for Brexit and Trump, along with widespread political volatility, are not only causing turmoil; they are signs that many long-predicted tipping points in media and politics have been reached. Such changes have worrying implications for democracies everywhere. In this text, Aeron Davis bridges old and new to map the shifts and analyse what they mean for our aging democracies. Why are volatile, polarized electorates no longer prepared to support established political parties? Why are large parts of the legacy media either dying or dismissed as 'fake news'? How is social media rapidly rewriting the rules? And why do some democratic leaders look more like dictators, and pollsters and economists more like fortune tellers? These questions and more are addressed in the book. Political Communication: A New Introduction for Crisis Times both introduces and challenges the established literature. It will appeal to advanced students, scholars and anyone else trying to understand the precarious state of today's media and political landscape.
Anamorphic Authorship in Canonical Film

Adaptation - Robert Geal 2019-05-21
This book develops a new approach for the study of films adapted from canonical 'originals' such as Shakespeare's plays. Departing from the current consensus that adaptation is a heightened example of how all texts inform and are informed by other texts, this book instead argues that film adaptations of canonical works extend cinema's inherent mystification and concealment of its own artifice. Film adaptation consistently manipulates and obfuscates its traces of 'original' authorial enunciation, and oscillates between overtly authored articulation and seemingly un-authored unfolding. To analyse this process, the book moves from a dialogic to a psychoanalytic poststructuralist account of film adaptations of Shakespeare's plays. The differences between these rival approaches to adaptation are explored in depth in the first part of the book, while the second part constructs a taxonomy of the various ways in which authorial signs are simultaneously foregrounded and concealed in adaptation's anamorphic drama of authorship.

Serial Selves - Frederik Byrn Køhlert 2019-03-15
Autobiography is one of the most dynamic and quickly-growing genres in contemporary comics and graphic narratives. In Serial Selves, Frederik Byrn Køhlert examines the genre's potential for representing lives and perspectives that have been socially marginalized or excluded. With a focus on the comics form's ability to produce alternative and challenging autobiographical narratives, thematic chapters investigate the work of artists writing from perspectives of marginality including gender, sexuality, disability, and race, as well as trauma. Interdisciplinary in scope and attuned to theories and methods from both literary and visual studies, the book provides detailed formal analysis to show that the highly personal and hand-drawn aesthetics of comics can help artists push against established narrative and visual conventions, and in the process invent new ways

of seeing and being seen. As the first comparative study of how comics artists from a wide range of backgrounds use the form to write and draw themselves into cultural visibility, Serial Selves will be of interest to anyone interested in the current boom in autobiographical comics, as well as issues of representation in comics and visual culture more broadly.
True Event Adaptation - Davinia Thornley 2019-10-23

Amateur Media and Participatory Cultures - Annamaria Motrescu-Mayes 2019-01-23 Amateur Media and Participatory Cultures aims to delineate the boundary line between today's amateur media practice and the canons of professional media and film practice. Identifying various feasible interpretative frameworks, from historical to anthropological perspectives, the volume proposes a critical language able to cope with amateur and new media's rapid technological and interpretative developments. Conscious of the fact that amateur media continue to be seen as the benchmark of visual records of authentic rather than mass-media-derived events, Annamaria Motrescu-Mayes and Susan Aasman pay particular attention to the ways in which diverse sets of concepts of amateur media have now merged across global visual narratives and everyday communication protocols. Building on key research questions and content analysis in media and communication studies, they have assessed differences between professional and amateur media productions based on the ways in which the 'originators' of an image have been influenced by, or have challenged, their context of production. This proposes that technical skills, degrees of staging and/or censoring visual information, and patterns in media socialisation define central differences between professional and amateur media production, distribution and consumption. The book's methodical and

interdisciplinary approach provides valuable insights into the ways in which visual priming, cultural experiences and memory-building are currently shaped, stored and redistributed across new media technologies and visual channels.

Bad Film Histories - Katherine Groo 2019-02-26
A daring, deep investigation into ethnographic cinema that challenges standard ways of writing film history and breaks important new ground in understanding archives Bad Film Histories is a vital work that unsettles the authority of the archive. Katherine Groo daringly takes readers to the margins of the film record, addressing the undertheorization of film history and offering a rigorous corrective. Taking ethnographic cinema as a crucial case study, Groo challenges standard ways of thinking and writing about film history and questions widespread assumptions about what film artifacts are and what makes them meaningful. Rather than filling holes, Groo endeavors to understand the imprecisions and absences that define film history and its archives. Bad Film Histories draws on numerous

works of ethnographic cinema, from Edward S. Curtis's In the Land of the Head Hunters, to a Citroën-sponsored "croisière" across Africa, to the extensive archives of the Maison Lumière and the Musée Albert-Kahn, to dozens of expedition films from the 1910s and 1920s. The project is deeply grounded in poststructural approaches to history, and throughout Groo draws on these frameworks to offer innovative and accessible readings that explain ethnographic cinema's destabilizing energies. As Groo describes, ethnographic works are mostly untitled, unauthored, seemingly infinite in number, and largely unrestored even in their digital afterlives. Her examination of ethnographic cinema provides necessary new thought for both film scholars and those who are thrilled by cinema's boundless possibilities. In so doing, she boldly reexamines what early ethnographic cinema is and how these films produce meaning, challenging the foundations of film history and prevailing approaches to the archive.

Cultural Politics Around East Asian Cinema 1939-2018 - Noriko Sudo 2019-02

This book examines the interdependent relationships between the film industry and the state in East Asia, treating films as political economic products, mixtures of government policy and industrial motives, rather than mere works of art or media commodities. We examine the East Asian film industries from the 1930s to the 2010s pursuing their own economic and political goals by cooperating, negotiating and conflicting with states. Through studies of national film policies, film industry strategies and cultural-political influences on audience receptivity, this book reveals how films are formed by the interaction of the state, the film companies and audiences.

Media and Democracy - James Curran 2011-03-31
Media and Democracy addresses key topics and themes in relation to democratic theory, media

and technology, comparative media studies, media and history, and the evolution of media research. For example: How does TV entertainment contribute to the democratic life of society? Why are Americans less informed about politics and international affairs than Europeans? How should new communications technology and globalisation change our understanding of the democratic role of the media? What does the rise of international ezines reveal about the limits of the internet? What is the future of journalism? Does advertising influence the media? Is American media independence from government a myth? How have the media influenced the development of modern society? Professor Curran's response to these questions provides both a clear introduction to media research, written for university undergraduates studying in different countries, and an innovative analysis written by one of the field's leading scholars.
The Politics of Digital India - Pradip Ninan

Thomas 2019-07-11
Transforming India into a digital state has been an objective of successive governments in India. However, the digital, by its very nature, is a capricious, multi-dimensional entity. Its operationalization across multiple sectors in India has highlighted the fact that the digital compact with publics in India is a two-edged sword. On the one hand, devices such as mobile phones have enabled access and efficiencies, and on the other, they have increased the scope for surveillance capitalism and the expansion of governmentality. The digital is at the same time a resource, commodity, and process that is absolutely fundamental to most if not all productive forces across multiple sectors. As a part of the Media Dynamics in South Asia series, this volume explores the making of digital India and specifically deals with the contradictions of an imperfect democracy, internal compulsions, and external pressures that continue to play crucial roles in the shaping of the same. Mindful

of the key roles played by political economy and context and based on conversations with theory and practice, it makes a case for critical understanding of the digital embrace in India.

Spanish Cinema of the New Millennium - Thomas G. Deveny 2019-05-15
Spanish Cinema of the New Millennium provides a new approach to the study of contemporary Spanish cinema between 2000 and 2015, by analysing films that represent both 'high' and 'popular' culture side by side. The two film cultures are represented by Goya-winning films and the biggest box-office successes. By analysing the chronological trajectory of the country's most important films over this period, Spanish Cinema of the New Millennium examines contemporary Spain's national identity, culture and film industry.

Journalism, Gender and Power - Cynthia Carter 2019-02-12
Journalism, Gender and Power revisits the key themes explored in the 1998 edited collection News, Gender and Power. It takes stock of progress made to date, and also breaks ground in advancing critical understandings of how and why gender matters for journalism and current democratic cultures. This new volume develops research insights into issues such as the influence of media ownership and control on sexism, women's employment, and "macho" news cultures, the gendering of objectivity and impartiality, tensions around the professional identities of journalists, news coverage of violence against women, the sexualization of women in the news, the everyday experience of normative hierarchies and biases in newswork, and the gendering of news audience expectations, amongst other issues. These issues prompt vital questions for feminist and gender-centred explorations concerned with reimagining journalism in the public interest. Contributors to this volume challenge familiar perspectives, and in so doing, extend current parameters of dialogue and debate in fresh

directions relevant to the increasingly digitalized, interactive intersections of journalism with gender and power around the globe. Journalism, Gender and Power will inspire readers to rethink conventional assumptions around gender in news reporting—conceptual, professional, and strategic—with an eye to forging alternative, progressive ways forward.

Polish Migrants in European Film 1918–2017 - Kris Van Heuckelom 2019-04-23
This study explores the representation of international migration on screen and how it has gained prominence and salience in European filmmaking over the past 100 years. Using Polish migration as a key example due to its long-standing cultural resonance across the continent, this book moves beyond a director-oriented approach and beyond the dominant focus on postcolonial migrant cinemas. It succeeds in being both transnational and longitudinal by including a diverse corpus of more than 150 films from some twenty different countries, of which Roman Polański's The Tenant, Jean-Luc Godard's Passion and Krzysztof Kieślowski's Trois couleurs: Blanc are the best-known examples. Engaging with contemporary debates on modernisation and Europeanisation, the author proposes the notion of "close Otherness" to delineate the liminal position of fictional characters with a Polish background. Polish Migrants in European Film 1918-2017 takes the reader through a wide range of genres, from interwar musicals to Cold War defection films; from communist-era exile right up to the contemporary moment. It is suitable for scholars interested in European or Slavic studies, as well as anyone who is interested in topics such as identity construction, ethnic representation, East-West cultural exchanges and transnationalism.

Lesbian Cinema after Queer Theory - Clara Bradbury-Rance 2019-01-30
The unprecedented increase in lesbian representation over the past two decades has, paradoxically, coincided with queer theory's radical transformation of the study of sexuality. In Lesbian Cinema after Queer Theory, Clara Bradbury-Rance argues that this contradictory context has yielded new kinds of cinematic language through which to give desire visual form. By offering close readings of key contemporary films such as Blue Is the Warmest Colour, Water Lilies and Carol alongside a broader filmography encompassing over 300 other films released between 1927 and 2018, the book provokes new ways of understanding a changing field of representation. Bradbury-Rance resists charting a narrative of representational progress or shoring up the lesbian's categorisation in the newly available terms of the visible. Instead, she argues for a feminist framework that can understand lesbianism's queerness. Drawing on a provocative theoretical and visual corpus, Lesbian Cinema after Queer Theory reveals the conditions of lesbian legibility in the twenty-first century.

Consumer Identities - Candice D. Roberts 2019-07-15
This edited collection explores the notion of agency by tracing the role and activities of consumers from the pre-Internet age into the possible future. Using an overview of the historical creation of consumer identity, Consumer Identities demonstrates that active consumption is not merely a product of the digital age; it has always been a means by which a person can develop identity. Grounded in the acknowledgement that identity is a constructed and contested space, the authors analyse emerging dynamics in contemporary

consumerism, ongoing tensions of structure and agency in consumer identities and the ways in which identity construction could be influenced in the future. By exploring consumer identity through examples in popular culture, the authors have created a scholarly work that will appeal to industry professionals as well as academics.

Animated Personalities - David McGowan 2019-02-26
Mickey Mouse, Betty Boop, Donald Duck, Bugs Bunny, Felix the Cat, and other beloved cartoon characters have entertained media audiences for almost a century, outliving the human stars who were once their contemporaries in studio-era Hollywood. In Animated Personalities, David McGowan asserts that iconic American theatrical short cartoon characters should be legitimately regarded as stars, equal to their live-action counterparts, not only because they have enjoyed long careers, but also because their star personas have been created and marketed in ways also used for cinematic celebrities. Drawing on detailed archival research, McGowan analyzes how Hollywood studios constructed and manipulated the star personas of the animated characters they owned. He shows how cartoon actors frequently kept pace with their human counterparts, granting "interviews," allowing "candid" photographs, endorsing products, and generally behaving as actual actors did—for example, Donald Duck served his country during World War II, and Mickey Mouse was even embroiled in scandal. Challenging the notion that studios needed actors with physical bodies and real off-screen lives to create stars, McGowan demonstrates that media texts have successfully articulated an off-screen existence for animated characters. Following cartoon stars from silent

movies to contemporary film and television, this groundbreaking book broadens the scope of star studies to include animation, concluding with provocative questions about the nature of stardom in an age of digitally enhanced filmmaking technologies.

The Power of Sports - Michael Serazio 2019-04-23
A provocative, must-read investigation that both appreciates the importance of—and punctures the hype around—big-time contemporary American athletics In an increasingly secular, fragmented, and distracted culture, nothing brings Americans together quite like sports. On Sundays in September, more families worship at the altar of the NFL than at any church. This appeal, which cuts across all demographic and ideological lines, makes sports perhaps the last unifying mass ritual of our era, with huge numbers of people all focused on the same thing at the same moment. That timeless, live quality—impervious to DVR, evoking ancient religious rites—makes sports very powerful, and very lucrative. And the media spectacle around them is only getting bigger, brighter, and noisier—from hot take journalism formats to the creeping infestation of advertising to social media celebrity schemes. More importantly, sports are sold as an oasis of community to a nation deeply divided: They are escapist, apolitical, the only tie that binds. In fact, precisely because they appear allegedly "above politics," sports are able to smuggle potent messages about inequality, patriotism, labor, and race to massive audiences. And as the wider culture works through shifting gender roles and masculine power, those anxieties are also found in the experiences of female sports journalists, athletes, and fans, and through the coverage of violence by and against male bodies. Sports, rather than being the one thing everyone can agree on, perfectly encapsulate the roiling tensions of modern American life. Michael Serazio maps and critiques the cultural

production of today's lucrative, ubiquitous sports landscape. Through dozens of in-depth interviews with leaders in sports media and journalism, as well as in the business and marketing of sports, The Power of Sports goes behind the scenes and tells a story of technological disruption, commercial greed, economic disparity, military hawkishness, and ideals of manhood. In the end, despite what our myths of escapism suggest, Serazio holds up a mirror to sports and reveals the lived realities of the nation staring back at us.

Online TV - Catherine Johnson 2019-01-04 With growth in access to high-speed broadband and 4G, and increased ownership of smartphones, tablets and internet-connected television sets, the internet has simultaneously begun to compete with and transform television. Online TV argues that these changes create the conditions for an emergent internet era that challenges the language and concepts that we have to talk about television as a medium. In a wide-ranging analysis, Catherine Johnson sets out a series of conceptual frameworks designed to provide a clearer language with which to analyse the changes to television in the internet era and to bring into focus the power dynamics of the online TV industry. From providing definitions of online TV and the online TV industry, to examining the ways in which technology, rights, interfaces and algorithms are used to control and constrain access to audiovisual content, Online TV is a timely intervention into debates about contemporary internet and television cultures. A must-read for any students, scholars and practitioners who want to understand and analyse the ways in which television is intertwining with and being transformed by the internet.

Jugaad Time - Amit S. Rai 2019-02-05 In India, the practice of jugaad—finding workarounds or hacks to solve problems—emerged out of subaltern strategies of negotiating poverty, discrimination, and

violence but is now celebrated in management literature as a disruptive innovation. In Jugaad Time Amit S. Rai explores how jugaad operates within contemporary Indian digital media cultures through the use of the mobile phone. Rai shows that despite being co-opted by capitalism to extract free creative labor from the workforce, jugaad is simultaneously a practice of everyday resistance, as workers and communities employ hacks to oppose corporate, caste, and gender power. Locating the tensions surrounding jugaad—as both premodern and postdigital, innovative and oppressive—Rai maps how jugaad can be used to undermine neoliberal capitalist media ecologies and nationalist politics.
