Islamic Law and Society - Emine Enise Yakar 2021-09-30

This book places context at the core of the Islamic mechanism of *iftā'* to better understand the process of issuing *fatwās* in Muslim and non-Muslim countries, thus highlighting the connection between context and contemporaneity, on one hand, and the adaptable perception of Islamic law, on the other. The practice of *iftā'* is one of the most important mechanisms of Islamic law that keeps Islamic thought about ethical and legal issues in harmony with the demands, exigencies and developments of time. This book builds upon the existing body of work related to the practice of *iftā'*, but takes the discussion beyond the current debates with the intent of unveiling the interaction between Islamic legal methodologies and different environmental contexts. The book specifically addresses the three institutions (Saudi Arabia's *Dār al-Iftā'*,

Turkey's *Diyanet* and America's *FCNA*) and their Islamic legal opinions (*fatwās*) in a comparative framework. This demonstrates the existence of complex and diverse ideas around similar issues within contemporary Islamic legal opinions that is further complicated by the influence of international, social, political, cultural and ideological contexts. The book thus unveils a more complicated range of interactive constituents in the process of the practice of *iftā'* and its outputs, *fatwās*. The work will be of interest to academics and researchers working in the areas of Islamic law, Middle Eastern studies, religion and politics.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation - Christopher B. Field 2012-05-28

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Networks of Outrage and Hope - Manuel Castells 2015-06-04

Networks of Outrage and Hope is an exploration of the new forms of social movements and protests that are erupting in the world today, from the Arab uprisings to the indignadas movement in Spain, from the Occupy Wall Street movement to the social protests in Turkey, Brazil and elsewhere. While these and similar social movements differ in many important ways, there is one thing they share in common: they are all interwoven inextricably with the creation of autonomous communication networks supported by the Internet and wireless communication. In this new edition of his timely and important book, Manuel Castells examines the social, cultural and political roots of these new social movements, studies their innovative forms of self-organization, assesses the precise role of technology in the dynamics of the movements, suggests the reasons for the support they have found in large segments of society, and probes their capacity to induce political change by influencing people's minds. Two new chapters bring the analysis up-to-date and draw out the implications of these social movements and protests for understanding the new forms of social change and political democracy in the global network society.

What Works in Girls' Education - Gene B Sperling 2015-09-29

Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls'

education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

A Forest in the Clouds: My Year Among the Mountain Gorillas in the Remote Enclave of Dian Fossey - John Fowler 2018-02-06

For the first time, a riveting insider's account of the fascinating world of Dr. Dian Fossey's mountain gorilla camp, telling the often-shocking story of the unraveling of Fossey's Rwandan facility alongside adventures tracking mountain gorillas over hostile terrain, confronting aggressive silverbacks, and rehabilitating orphaned baby gorillas. In *A Forest in the Clouds*, John Fowler takes us into the world of Karisoke Research Center, the remote mountain gorilla camp of Dr. Dian Fossey, a few years prior to her gruesome murder. Drawn to the adventure and promise of learning the science of studying mountain gorillas amid the beauty of Central Africa's cloud forest, Fowler soon learns the cold harsh realities of life inside Fossey's enclave ten thousand feet up in the Virunga Volcanoes. Instead of the intrepid scientist he had admired in the pages of *National Geographic*, Fowler finds a chain-smoking, hard-drinking woman bullying her staff into submission. While pressures mount from powers beyond Karisoke in an effort to extricate Fossey from her domain of thirteen years, she brings new students in to serve her most pressing need—to hang on to the remote research camp that has become her mountain home. Increasingly bizarre behavior has targeted Fossey for extrication by an ever-growing group of detractors—from conservation and research organizations to the Rwandan government. Amid the turmoil, Fowler must abandon his own research assignments to assuage the troubled Fossey as she orders him on illegal treks across the border into Zaire, over volcanoes, in search of missing gorillas, and to serve as surrogate parent to an orphaned baby ape in preparation for its traumatic re-introduction into a wild gorilla group. This riveting story is the only first-person account from inside Dian Fossey's beleaguered camp. Fowler must come to grips with his own aspirations, career objectives, and disappointments as he develops the physical endurance to keep up with mountain gorillas over volcanic terrain in icy downpours above ten thousand feet, only to be affronted by the frightening charges of indignant giant silverbacks or to be treed by aggressive forest buffalos. Back in camp, he must nurture the sensitivity and patience needed for the demands of rehabilitating an orphaned baby gorilla. *A Forest in the Clouds* takes the armchair adventurer on a journey into an extraordinary world that now only exists in the memories of the very few who knew it.

Design and the Digital Humanities - Milena Radzikowska 2022-04-15

This is an essential practical guide for academics, researchers and professionals involved in the digital humanities, as well as designers working with them. It prepares readers from both fields for working together, outlining disciplinary perspectives and lessons learned from more than twenty years of experience, with over two dozen practical exercises. The central premise of the book is a timely one – that the twin disciplines of visual communication design and digital humanities (DH) are natural allies, with much to be gained for researchers, students and practitioners from both areas who are able to form alliances with those from the other side. The disciplines share a common fundamental belief in the extraordinary value of interdisciplinarity, which in this case means that the training, experience and inclinations from both fields naturally tend to coincide. The fields also share an interest in research that focuses on humanities questions and approaches, where the goal is to improve understanding through repeated observation and discussion. Both disciplines tend to be generative in nature, with the ultimate end in many cases of designing and creating the next generation of systems and tools, whether those be intended for dealing with information or communication. The interdisciplinary nature of this book is both a strength and a challenge. For those academics and practitioners who have worked with the other discipline, this will be a much-welcomed handbook of terminology, methods and activities. It will also be of interest to those who have read about, seen presented and used the outcomes of successful design and DH collaborations, and who might be interested in forming similar partnerships. However, for all they have in common, design and digital humanities also have significant differences. This book discusses these issues in the context of a variety of research projects as well as classroom activities that have been tried and tested. This book will provide both design and the digital humanities with a better mutual understanding, with the practical intention of working effectively together in ways that are productive and satisfying for everyone involved. Design education has a long history, a presence in many post-secondary institutions, and a robust market for educational and practice-based literature. The Digital Humanities community, in contrast, is much younger, but rising rapidly, both academically and within industry. Both design and DH are collaborative disciplines, with much in common in terms of vision, but with confusing overlap in

terminology and ways-to-practice. The book describes and demonstrates foundational concepts from both fields with numerous examples, as well as projects, activities and further readings at the end of each chapter. It provides complete coverage of core design and DH principles, complete with illustrated case studies from cutting-edge interdisciplinary research projects. Design and the Digital Humanities offers a unique approach to mastering the fundamental processes, concepts, and techniques critical to both disciplines. It will be of interest to those who have been following previous work by bestselling authors in the fields of visual communication design and the digital humanities, such as Ellen Lupton, Steven Heller, Julianne Nyhan, Claire Warwick and Melissa Terras. This guide is suitable for use as an undergraduate or masters-level text, or as an in-the-field reference guide. Throughout the book, terms or concepts that may not be familiar to all readers are carefully spelled out with examples so that the text is as accessible as possible to non-technical readers from a range of disciplines.
