The Measure of Madness: - Cheryl Paradis
2010-07-01

Enter the “fascinating” and frightening world of modern forensic psychology as experienced by one of the most respected practitioners in the field today (Robert K. Tanenbaum, New York Times-bestselling author). At the heart of countless crimes lie the mysteries of the human mind. In this eye-opening book, Dr. Cheryl Paradis draws back the curtain on the fascinating world of forensic psychology, and

revisits the most notorious and puzzling cases she has handled in her multifaceted career. Her riveting, sometimes shocking stories reveal the crucial and often surprising role forensic psychology plays in the pursuit of justice—in which the accused may truly believe their own bizarre lies, creating a world that pushes them into committing horrific, violent crimes. Join Dr. Paradis in a stark concrete cell with the indicted as she takes on the daunting task of mapping the suspect’s madness or exposing it as fakery. Take a front-row seat in a tense, packed courtroom, where her testimony can determine an individual’s fate—or if justice will be truly served. The criminal thought process has never been so intimately revealed—or so darkly compelling—as in this “excellent and entertaining” journey into the darkest corners of the human mind (Booklist).

The Coal Handbook: Towards Cleaner Production - Dave Osborne 2013-10-31

Coal remains an important fossil fuel resource for many nations due to its large remaining resources, relatively low production and processing cost and potential high energy intensity. Certain issues surround its utilisation, however, including emissions of pollutants and growing concern about climate change. The coal handbook: Towards cleaner production Volume 2 explores global coal use in industry. Part one is an introductory section which reviews the social and economic value of coal, emissions from coal utilisation, the handling, impact and utilisation of coal waste, and an exploration of emerging and future issues around industrial coal utilization. Chapters in part two highlight coal resources, production and use in established markets as well as the emerging markets of Brazil, the Russian Federation, India, Indonesia,

and China. Part three focuses specifically on coal utilisation in industry. Chapters consider thermal coal utilisation, coal use in iron and steel metallurgy, advances in pulverised fuel technology, and the evaluation of coal for thermal and metallurgical applications. Further chapters explore coal utilisation in the cement and concrete industries, coal gasification and conversion, and value-in-use assessment for thermal and metallurgical coal. A final chapter summarises the anticipated future pathway towards sustainable, long-term coal use, suggesting transitions that will be needed to ensure cleaner utilisation for many decades to come. With its distinguished editor and international team of expert contributors, The coal handbook Volumes 1 and 2 is a comprehensive and invaluable resource for professionals in the coal mining, preparation, and utilisation industry, those in the power sector, including plant operators and engineers, and researchers and academics interested in this

Disciple IV - Abingdon Press 2005-05

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to

convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New

Testament times.

New - Winifred Gallagher 2011-12-29

Why are we attuned to the latest headline, diet craze, smartphone, fashion statement? Why do we relish a change of scene, eye attractive strangers, develop new interests? How did Homo sapiens survive near-extinction during an environmental crisis 80,000 years ago, while close cousins very like us have died out? Why is

your characteristic reaction to novelty and change the key to your whole personality? Why do we enjoy inexpensive pleasures, like fresh flowers or great chocolate, more than costly comforts, like cars or appliances? How can a species genetically geared to engage with novelty cope in a world that increasingly bombards us with it? Follow a crawling baby around and you'll see that right from the beginning, nothing excites us more than something new and different. Our unique human brains are biologically primed to engage with and even generate novelty, from our ancestors' first bow and arrow to the latest tablet computer. This "neophilia" has enabled us to thrive in a world of cataclysmic change, but now, we confront an unprecedented deluge of new things, from products to information, which has quadrupled in the past 30 years and shows no sign of slowing. To prevent our great strength from becoming a weakness in today's fast-paced world, we must re-connect with neophilia's

grand evolutionary purpose: to help us learn, create, and adapt to new things that have real value and dismiss the rest as distractions. In *New: Understanding Our Need for Novelty and Change*, Winifred Gallagher, acclaimed behavioral science writer and author of *Rapt*, takes us to the cutting-edge laboratories and ancient archeological sites where scientists explore our special affinity for novelty and change. Although no other species can rival our capacity to explore and experiment with the new, we individuals vary in how we balance the conflicting needs to avoid risk and approach rewards. Most of us are moderate "neophiles," but some 15 per cent of us are die-hard "neophiliacs," who have an innate passion for new experiences, and another 15 per cent are cautious "neophobes," who try to steer clear of them—a 1-5-1 ratio that benefits the group's well-being. Wherever you sit on the continuum, *New* shows you how to use this special human gift to navigate more skillfully through our

rapidly changing world by focusing on the new things that really matter.

as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. One of the most neglected and obscure books by W. E. B. Du Bois, *In Battle for Peace* frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the

United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial-he was later acquitted-and faced political persecution for over a decade. Part autobiography and part political statement, *In Battle for Peace* remains today a powerful analysis of race in America. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by Manning Marable, this edition is essential for anyone interested in African American history.
