**Scenography as New Ideology in Contemporary Curating: The Notion of Staging in Exhibitions** - Margaret Choi Kwan Lam 2014-09-01

Scenography has been acting as a transformative force to reform the traditional exhibitionary complex. This has led to an unprecedented intersection where scenography meets contemporary curating, which further informs a radical ideological shift in the frontier of the exhibition scene. This book aims to exploit a new land of discussion to look into this intersection between scenographic practice and contemporary curating, its emergence and the subsequent revolution it has caused. By seeing museums and exhibition spaces as metaphorical stages, it fundamentally reconfigures the infrastructure of curating practices, in terms of a shift in authorship, architectural embodiment of ideas, field of experience, layered narrative, dramaturgy and the hybrid expressions of new media. Three case studies will demonstrate scenography's wide-ranged methodologies in dealing with contemporary issues. Cases include: BMW Museum (Reopened in 2008),

Cultures of the World (Opened in 2010) and Leonardo's Last Supper: A Vision by Peter Greenaway (2008, 2010). The discussion cuts through major discourses, both responding to the rise of the experience economy and the expanding notion of curating, in parallel.

**Cheating, Corruption, and Concealment** - Jan-Willem van Prooijen 2016-06-30

Dishonesty is ubiquitous in our world. The news is frequently filled with high-profile cases of corporate fraud, large-scale corruption, lying politicians, and the hypocrisy of public figures. On a smaller scale, ordinary people often cheat, lie, misreport their taxes, and mislead others in their daily life. Despite such prevalence of cheating, corruption, and concealment, people typically consider themselves to be honest, and often believe themselves to be more moral than most others. This book aims to resolve this paradox by addressing the question of why people are dishonest all too often. What motivates dishonesty, and how are people able to perceive themselves as moral despite their dishonest behaviour? What personality and interpersonal factors make dishonesty more likely? And what can be done to recognise and reduce dishonesty? This is a fascinating overview of state-of-the-art research on dishonesty, with prominent scholars offering their views to clarify the roots of dishonesty.

*Life, Liberty, Luxury and Love?* - Olivier A. Guigues 2017-11-17

Mirabella had even booked a NetJets Excel, but unfortunately, their passenger never arrived. Leanna kindly asked one of her best friends working at the NSA to activate her access to the satellites. Using Echelon on another computer, she managed to jam the engine software on Veronica's chauffeured car. When the limo got closer to a truck in the opposite direction, she pushed the enter-key on her laptop. Within a second, the driver suffered a heart failure through an electrical discharge on the steering wheel; a wrong steering signal was sent to the servo-control as well as a brake jamming. The car jumped into the air, doing a barrel-roll and crashing on the other side of the A8, into the approaching truck transporting liquid gas.

**Lemon-Aid Used Cars and Trucks 2012-2013** - Phil Edmonston 2012-05-19

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

**Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles** - National Research Council 2015-09-28

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.
