Visual Global Politics - Roland Bleiker

2018-02-13

We live in a visual age. Images and visual artefacts shape international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election campaigns. Other

visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance cameras watch us around the clock and deliver images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around the world. Digital media

Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, Visual Global Politics is a one-stop source for students, scholars and practitioners interested in understanding the crucial and persistent role of images in today's world.

Mapping Society - Laura Vaughan 2018-09-24

From a rare map of yellow fever in eighteenth-century New York, to Charles Booth's famous maps of poverty in nineteenth-century London, an Italian racial zoning map of early twentieth-century Asmara, to a map of wealth disparities in the banlieues of twenty-first-century Paris, Mapping Society traces the evolution of social cartography over the past two centuries. In this richly illustrated book, Laura Vaughan examines maps of ethnic or religious difference, poverty, and health inequalities, demonstrating how they not only serve as historical records of social enquiry, but also constitute inscriptions of social patterns that have been etched deeply on the surface of cities. The book covers themes such as the use of visual rhetoric to change public opinion, the evolution of sociology as an

academic practice, changing attitudes to physical disorder, and the complexity of segregation as an urban phenomenon. While the focus is on historical maps, the narrative carries the discussion of the spatial dimensions of social cartography forward to the present day, showing how disciplines such as public health, crime science, and urban planning, chart spatial data in their current practice. Containing examples of space syntax analysis alongside full colour maps and photographs, this volume will appeal to all those interested in the long-term forces that shape how people live in cities.

Could 7/7 Have Been Prevented? - Great Britain. Intelligence and Security Committee 2009

On Monday 30 April 2007, five men were convicted of terrorist offences relating to a plot to detonate a fertiliser bomb in the UK in 2004. The arrests were the result of a police and MI5 operation codenamed CREVICE. Following the trial, the media reported that, at the time MI5 had been investigating CREVICE, the bomb plotters had been in contact with two unidentified men now known to be Mohammed Siddique Kahn and Shazad Tanweer, two of the four men who, on 7 July 2005, detonated bombs on the London transport system, killing 52 people and injuring several hundred others. This report investigates why MI5, knowing of Khan and Tanweer, did not prevent the 2005 bombings. Part A examines what happened in

Operation CREVICE and subsequently. Part B describes when MI5 came across some of the 7/7 bombers and the questions these events raise. Part C of the report considers the wider picture and lessons to be learnt. The CREVICE conspirators made over 4,000 telephone-based contacts and met many people. Throughout 2004 and 2005 these were being investigated by MI5 as they pursued other plots and unearthed still more people of interest on the sidelines of each plot. Although Khan and Tanweer were amongst those of interest, though still unidentified, they were never put under surveillance as, based on what was known about them at the time, they did not merit resources being diverted to them (as opposed to other individuals known to be involved in attack planning). The Committee cannot criticise the judgments made by MI5 and the police based on the information they had and their priorities at the time. An update to the report outlines the reason for the delay in publication pending completion of other legal

proceedings and gives further evidence uncovered recently.

A History of the World in 100 Objects and Germany 'Riveting, extraordinary ... tells the sweeping story of religious belief in all its inventive variety. The emphasis is not on our differences, but on shared spiritual yearnings' Rachel Campbell-Johnston, The Times, Books of the Year One of the central facts of human existence is that every society shares a set of beliefs and assumptions - a faith, an ideology, a religion - that goes far beyond the life of the individual. These beliefs are an essential part of a shared identity. They have a unique power to define - and to divide - us, and are a driving force in the politics of much of the world today. Throughout history they have most often been, in the widest sense, religious. Yet this book is not a history of religion, nor an argument in favour of faith. It is about the stories which give shape to our lives, and the different ways in which societies imagine their place in the world. Looking across history and around the globe, it interrogates objects, places and human activities

to try to understand what shared beliefs can mean in the public life of a community or a nation, how they shape the relationship between the individual and the state, and how they help give us our sense of who we are. For in deciding how we live with our gods, we also decide how to live with each other. 'The new blockbuster by the museums maestro Neil MacGregor ... The man who chronicles world history through objects is back ... examining a new set of objects to explore the theme of faith in society' Sunday Times

[The Unfinished Life of Benjamin Franklin](#) - Douglas Anderson 2012-06-01

Benjamin Franklin wrote his posthumously published memoir—a model of the genre—in several pieces and in different temporal and physical places. Douglas Anderson’s study of this work reveals the famed inventor as a literary adept whose approach to autobiographical narrative was as innovative and radical as the inventions and political thought for which he is renowned. Franklin never completed his autobiography, choosing instead to immerse his reader in the formal and textual atmosphere of a deliberately “unfinished” life. Taking this decision on Franklin’s part as a starting point, Anderson treats the memoir as a subtle and rewarding reading lesson, independent of the famous life that it dramatizes but closely linked to the work of predecessors and successors like John Bunyan and Alexis de Tocqueville, whose books help illuminate Franklin’s complex imagination. Anderson shows that Franklin’s

incomplete story exploits the disorderly and disruptive state of a lived life, as opposed to striving for the meticulous finish of standard memoirs, biographies, and histories. In presenting Franklin's autobiography as an exemplary formal experiment in an era that its author once called the Age of Experiments, *The Unfinished Life of Benjamin Franklin* veers away from the familiar practices of traditional biographers, viewing history through the lens of literary imagination rather than the other way around. Anderson's carefully considered work makes a persuasive case for revisiting this celebrated book with a keener appreciation for the subtlety and beauty of Franklin's performance.

The Googlization of Everything - Siva Vaidhyanathan 2012-03-13

Into this creative chaos came Google with its dazzling mission—"To organize the world's information and make it universally accessible"—and its much-quoted motto, "Don't be evil." In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google—and the growing resistance to its expansion across the globe. He

The Making of Global Capitalism - Leo Panitch
2012-10-15

A groundbreaking account of America's role in global capitalism. The all-encompassing embrace of world capitalism at the beginning of the twenty-first century was generally attributed to the superiority of competitive markets.

Globalization had appeared to be the natural outcome of this unstoppable process. But today, with global markets roiling and increasingly reliant on state intervention to stay afloat, it has

become clear that markets and states aren't straightforwardly opposing forces. In this groundbreaking work, Leo Panitch and Sam Gindin demonstrate the intimate relationship between modern capitalism and the American state, including its role as an "informal empire" promoting free trade and capital movements. Through a powerful historical survey, they show how the US has superintended the restructuring of other states in favor of competitive markets and coordinated the management of increasingly frequent financial crises. *The Making of Global Capitalism*, through its highly original analysis of the first great economic crisis of the twenty-first century, identifies the centrality of the social conflicts that occur within states rather than between them. These emerging fault lines hold out the possibility of new political movements transforming nation states and transcending global markets.

The diary and essays of Brian Eno republished twenty-five years on with a new introduction by the artist in a beautiful hardback edition. 'One of

the seminal books about music . . . an invaluable insight into the mind and working practices of one of the industry's undeniable geniuses.' GUARDIAN At the end of 1994, Brian Eno resolved to keep a diary. His plans to go to the cinema, theatre and galleries fell quickly to the wayside. What he did do - and write - however, was astonishing: ruminations on his collaborative work with David Bowie, U2, James and Jah Wobble, interspersed with correspondence and essays dating back to 1978. These 'appendices' covered topics from the generative and ambient music Eno pioneered to what he believed the role of an artist and their art to be, alongside adroit commentary on quotidian tribulations and happenings around the world. This beautiful 25th-anniversary hardcover edition has been redesigned in the same size as the diary that eventually became this book. The Culture of Homelessness - Megan Ravenhill
2016-03-16

Despite an extensive literature on homelessness there is surprisingly little work that investigates the roots of homelessness by tracking homeless people over time. In this fascinating and much-needed ethnographic study, Megan Ravenhill presents the results of ten years' research on the streets and in the hostels and day-centres of the UK, incorporating intensive interviews with 150 homeless and formerly homeless people as well as policy makers and professionals working with homeless people. Ravenhill discusses the biographical, structural and behavioural factors that lead to homelessness. Amongst the important and unique features of the study are: the use of life-route maps showing the circumstances and decisions that lead to homelessness, a systematic study of the

timescales involved, and a survey of people's exit routes from homelessness. Ravenhill also identifies factors that predict those most vulnerable to homelessness and factors that prevent or considerably delay the onset of homelessness.
