Corporate Tax Base in the Light of the IAS/IFRS and EU Directive 2013/34: A Comparative Approach - Mario Grandinetti 2016-06-17

The recent relaunch of the European Commission's Common Consolidated Corporate Tax Base (CCCTB) project promises a sorely needed leap forward in the harmonization of the rules by which companies calculate their taxable profits. In particular, the initiative hopes to remedy the severe barrier to cross-border business caused by the 'the accounting Tower of Babel' by which companies' tax bases are determined under national law. This thorough analysis and commentary covers the influence of accounting rules on tax, considering both generally accepted standards - international accounting standards (IAS) and international financial reporting standards (IFRS) - and EU Directive 2013/34. Three introductory chapters usher in detailed comparative overviews of the effect of these rules on taxation in nine EU Member States as well as in two other major EU trading partners, the United States and Brazil. Fully explaining the remarkable recent improvement in the comparability of accounts that represent favourable preconditions for creating a single market for financial services within the EU, this book covers every relevant detail, including the following and much more: - criterion of evaluation of alternative fixed assets based on revaluated amounts; - criterion based on fair value; - provisions applicable to income statements, notes, reports, and financial statements; - rules applicable to the publication of documents; - transparency in payments to governments; - dispositions on exemptions; - hierarchy of general provisions and principles; - balance sheet and profit and loss account; - simplifications for small and medium-sized

enterprises (SMEs); - system of creditors' protection; and - protection of investors' interests. This book is a peerless explication of the taxation choices granted to Member States under IAS/IFRS and EU Directive 2013/34 and how they will be affected by ongoing Commission initiatives. Because relevant, timely, reliable, and comparable information assumes a leading role in protecting the interests of investors, creditors, and other stakeholders, as well as in ensuring that all operators act on a level playing field under equal conditions, the analysis presented here is of immeasurable value to lawyers, business persons, and officials concerned with taxation, not only in Europe but anywhere within the reach of international trade.

New Models of Financing and Financial Reporting for European SMEs - Eva Kaili 2019-02-28

This book looks at the 23 million registered Small and Medium Enterprises (SMEs) that make up 98 per cent of the EU economy. Addressing the high end of SMEs in terms of new models for SME funding and financial reporting, this merged way of looking at SMEs reveals a 'myopic' thinking in terms of net present value and (future) cash flows generating short-termism and low risk appetite for business. This is not an accounting issue, but rather a preference toward certain financial tools. A segment of SMEs, the ones that seek new ways of funding possibilities, as well as modern technologies (MTFs listing, blockchain, ICOs, etc.) do require, even without knowing, IFRS for SMEs. This book reveals how market conditions impact the financial performance and sustainability of SMEs and also generate innovative policy interventions and financing strategies for SME integrity and efficiency. The authors frame their arguments in the context of the Capital Markets Union, looking at the Innovation Triangle, SME growth ecosystem and business models. They conclude by advocating

for closing the circle of financing and financial reporting for SMEs, while considering if new financial models of financing and financial reporting are good for all the SMEs or only for some. The economy is being shaped by new models of financing and financial reporting. Read this practitioners' view to understand the current changes and challenges.

Analysis Of The Korean Stock Market:

Behavioral Finance Approaches - Kim Keunsoo
2018-05-18

The Korean stock market, ranked 11th in the world in terms of market capitalization of stocks in 2017, is a globalized market. Foreign investors hold close to one-third of stocks listed on the Korea Exchange (KRX) as of May 2017 (in terms of market capitalization). The US and the UK alone account for almost 50% of foreign ownership in the KRX. Research or information on the Korean stock market, however, is not well known to the domestic or the global investment communities. There are minimal investment studies that deal with practical issues from the perspective of investment analysts. This volume bridges the academic and investment communities by providing analyses of the Korean stock market that contain practical values. This book comprehensively analyzes anomalies in the Korean stock market, including time series anomalies such as the January effect, cross-sectional anomalies such as the size effect and book-to-market effect, and anomalies related to corporate events. The authors also investigate sales revenue, profitability, valuation (M/B ratio), and the financial risk of listed companies in the Korean stock market at both the sectoral level and industrial level. As the study uses a comprehensive data set and long-term sample period, readers can benefit from consistent and comparable empirical results. Limiting Base Erosion - Erik Pinetz 2017-08-30
Limiting base erosion from different viewpoints Hybrid mismatch arrangements, CFC rules, transfer pricing rules: "Limiting Base Erosion", the general topic for the master theses of the part-time LL.M. program 2015-2017, has been one of the most controversial topics in international tax law ever since the initiation of

the OECD BEPS Project in 2013. Even though the final reports of the 15 BEPS Actions were released by the OECD in as early as October 2015, the question how to effectively target base erosion practices still has not lost any of its topicality. Following the efforts of the OECD in developing a new international tax environment, the focus of attention has now partly shifted to the OECD Member countries that have to properly implement the OECD recommendations in their domestic laws as well as in their tax treaty practice. In this respect, a comprehensive analysis in the literature of all the issues related to base erosion proves to be of the utmost importance in order to provide practical guidance to the Member countries during that the process of implementation. This book deals especially with four key areas of interest: Limiting base erosion by neutralizing the effects of hybrid mismatch arrangements Limiting base erosion by strengthening CFC rules Measures against base erosion via interest deductions and other financial payments Limiting base erosion by improving transfer pricing rules. On that basis, 27 concrete topics were chosen in order to address the four key areas of interest from different viewpoints. Base erosion and the challenges they present: read more in "Limiting Base Erosion".

Financial Reporting under IFRS - Wolfgang Dick
2010-10-11

The International Financial Reporting Standards are quite different from other sets of accounting standards, and are fundamentally different from US-GAAP, in that they are based on principles, and not on detailed rules. Financial Reporting

under IFRS: A topic-based approach offers a global perspective on IFRS by presenting the prescribed rationale and principles and illustrating them through numerous examples from large international companies. It aims to develop the fundamental skills necessary to read and use the information contained in all types of financial statements, through examples, activities, questions and answers. The book is broadly divided into three sections. Section one examines the structure of the Balance Sheet and the Income Statement, their links and the accounting mechanisms used to prepare them. Section two deals with the identification, evaluation and reporting of Balance Sheet items. Section three covers the use of financial statements to analyze a firm's performance and its risks. Throughout the book special topics are covered, including Derivatives and Hedge accounting (IAS 39), Business Combination (IFRS 3) and Operating Segments (IFRS 8). Financial Reporting under IFRS is ideally suited to the needs of students of accounting and financial reporting, but all users of financial statements, from creditors and investors to suppliers, customers, employees and governments will benefit from its concise, topic-based approach.

The Boundaries in Financial and Non-Financial Reporting - Laura Girella 2018-03-16

Although the need to expand the boundaries of financial reporting has been discussed since the mid-1990s, little consideration has been given to the evolution and discourses of integrated reporting of non-financial aspects. Yet by investigating how and why an organisation defines and its reporting boundaries, it is possible to understand what is truly "valued" (or not) in its business model. This innovative book reviews the guidelines and frameworks from the major relevant international organisations including: the International Accounting Standards Board, Global Reporting Initiative, Sustainability Accounting Standards Board, International Integrated Reporting Council, Carbon Disclosure Standards Board, and the World Intellectual Capital Initiative, and analyses their development and impact on the boundaries of financial and non-financial reporting. Illustrated with case studies and interviews with representatives of these organisations, this concise volume makes a significant contribution to the future of reporting theory and practice. It will be of great interest to

advanced students, researchers, practitioners and policy makers.
